Manuscript date: 30th January 2014
Revised:21st October 2023

Table of Contents	1 - 7
1. Introduction	8 - 12
2. Current Status of Nauruan	13, 14
3. Phonetics 3.1. Description of Consonant Phonemes 3.2. Some Observations on Sound Changes in Nauru during the 20th Century	15, 16 17 – 21 22-25

4. Orthography 4.1. Observations on Kayser's Orthographies 1936 1976 4.2. Observations on the Orthography of the 1918 Bible 4.3. Comparative Table of Nauruan Orthographies	26 27 – 29 30, 31 32 - 34
5. Abbreviations Used	35 - 41
6. Nauruan Demonstratives: An Overview	42, 43
7. General Demonstrative 7.1. General Demonstrative: Simple (or Base) Form 7.2. General Demonstrative: Augmented Simple Form 7.3 General Demonstrative: Origins of the Augmented Simple Form	44 45 – 55 56 – 59 59
8. General Demonstrative: Later Developments	60, 61
9. General Demonstrative: Emphatic Form 9.1. Use of General Demonstrative as Demonstrative Adjective 9.2. Use of General Demonstrative as Demonstrative Pronoun 9.3. Use of General Demonstrative as Relativizer 9.4. Use of General Demonstrative Emphatic Medial Form '*ngana*' before mental verbs and recording verbs 9.5. Origins of the Emphatic Form	62 – 64 65, 66 66 – 74 74 – 76 76 – 84 85 - 87
10. General Demonstrative: Augmented Emphatic Form 10.1. Origins of the Augmented Emphatic Form	88 – 91 91

11. General Demonstrative: Non- Emphatic Form	92 - 94
12. General Demonstrative: Non-Emphatic *min*- Form (NEI) 12.1. *min*- Syncopated Form	95 – 100 101 - 104
13. General Demonstrative: Non-Emphatic *bit*- Form including syncopated forms (NEIII) 13.1. Use of General Demonstrative: Non-Emphatic *bit*- Form (NEIII) as Demonstrative Adjective 13.2. Use of General Demonstrative: Non-Emphatic *bit*- Form (NEIII) as Demonstrative Pronoun 13.3. Use of General Demonstrative: Non-Emphatic *bit*- Syncopated Form (NEIII) as Demonstrative Adjective 13.4. Use of General Demonstrative: Non-Emphatic *bit*- Syncopated Form (NEIII) as Demonstrative Pronoun	105 – 108 109 – 113 114 – 118 118 – 122 122- 124
14. General Demonstrative: Non-Emphatic *mu*- Form including syncopated forms (NEII) 14.1. Use of General Demonstrative: Non-Emphatic *mu*- Form (NEII) as Demonstrative Adjective 14.2. Use of General Demonstrative: Non-Emphatic *mu*- Form (NEII) as Demonstrative Pronoun 14.3. Use of General Demonstrative: Non-Emphatic *mu*- Syncopated Form (NEII)	126, 126 127 127, 128 129
15. Overview of General Demonstratives	130, 131
16. New Information versus Old Information	132 - 134
17. Spread of Demonstrative Features	135
18. Animate Demonstrative	136

19. Animate Demonstrative Plural	136 -142
20. Gender Specific Demonstratives	143
21. Use of *'amen'*	143 - 145
22. Male Demonstrative	146 - 167
23. *rar* Demonstrative (Secondary Singular Male Demonstrative)	168 - 171
24. *angame* Demonstrative (Secondary Singular Male Demonstrative)	172, 173
25. Female Demonstrative	174 - 187
26. *ateb* Demonstrative (Secondary Female Demonstrative)	188 - 190
27. Animate Demonstrative Numeral 27.1. General Cardinal Numeral 27.2. Functional Vowel with Numerals 27.3. Animate Cardinal Numeral 27.4. Animate Demonstrative Numeral: Table and Examples 27.5. Compound Animate Demonstrative Numeral	191 191 – 195 196 – 199 200 – 205 206 – 214 215 - 218
28. Male Demonstrative Numeral 28.1. Lone Male Demonstrative Numeral	219 – 228 229 - 230

29. Female Demonstrative Numeral 29.1. Use of Female Demonstrative Numeral for Mixed Gender Groups 29.2. Lone Female Demonstrative Numeral	231 – 234 235 – 237 238
30. *aben* Demonstrative (Mixed Gender Demonstrative)	239 - 241
31. Alternative Stratagies for Animate and Gender Specific Demonstrative Numerals	241 - 243
32. Direct Address (Vocative) Demonstrative 32.1. Direct Address: Singular Fused Demonstratives 32.2. Direct Address: Singular Non-Fused Demonstratives 32.3. Direct Address: Non-Singular Forms of Address	244 244 – 249 249, 250 251 - 259
33. Demonstrative Cardinal Numeral 33.1. Compound Demonstrative Cardinal Numeral	260 – 271 272 - 276
34. Classificatory Demonstrative 34.1. Outline of Nauruan Classifiers 34.2. Examples of Classificatory Demonstratives	276 – 278 278 – 300 300 - 311
35. Classificatory Demonstrative Numeral 35.1. Classificatory Cardinal Numeral 35.2. Classificatory Demonstrative Numeral: Formation and Examples 35.3. Compound Classificatory Dermonstrative Numeral	312 313 – 339 339 – 380 380 - 383
36. Usage in Relative Clauses	384

37. Notes	384 - 387
39. References Footnote 1	388 - 407

1. Introduction

This is a text-based study of an aspect of Nauruan grammar that relies on publications in Nauruan dating mainly to the first half of the 20th Century, and re-analyses the description of the demonstrative system as described in Kayser's 1936 *Nauru Grammar*, with extensive examples from the 1918 Bible, the 1976 New Testament and other written sources. Also consulted were Lisa M. Johnson's "Nauruan Classifiers" (2002) and Kevin Hughes' "The Synchronic and Diachronic Phonology of Nauruan: Towards a Defifinitive Classification of an Understudied Micronesian Language" (2020). Any developments in contemporary Nauruan are only briefly touched on as it is not within the scope of the present study. The conclusions arrived at in this study differ from the conclusions arrived at by Kayser, Johnson, and Hughes in a number of respects.

With the passing away of the WWII generation, Nauruan has been undergoing change. The complex demonstrative system that was current in the first half of the 20th century has undergone simplification in that many of the classifiers related to traditional Nauruan culture and as these traditional aspects of culture have fallen into disuse, so have the classifiers. Johnson noted this is her 2002 work. Those members of the community who have access to and read the Nauruan Bible (published in 1918) and the Testament Etimeduw (New Testament, published in 1976) will have exposure to the system described here.

It is to be noted that the Nauruan reflected in the 1918 Bible and the 1976 New Testament and the language material presented in the 1936 *Nauru Grammar* are taken as valid representations of different registers of spoken Nauruan during the first half of the 20th Century.

The 1918 Bible was a culmination of 19 years of translation work by the American Protestant missionary Philip Adam Delaporte whose mother-tongue was German, having been born in Worms, Germany. Delaporte arrived on Nauru in 1899 and set about learning Nauruan and was helped in his translation endeavours by a number of Nauruans, notably Timothy Detudamo (later Head Chief of Nauru), Jacob Aroi (later Pastor and educator), and Deireragea (later Chief of Anibare District).[1] Apart from short periods of furlough, Delaporte was resident on Nauru from 1899 until he was excluded from returning to Nauru in 1915 while on furlough in the U.S.A. as he was viewed as a German sympathizer. He was in the U.S.A., along with Timothy Detudamo, to complete the translation work and to arrange for the printing of the Bible in the U.S.A.

he 1976 New Testament is attributed to the Roman Catholic missionary Alois Kayser, who served as a missionary to the Nauruan people between 1902 and his death due to mistreatment by Japanese military authorities in 1944. He was absent for a brief period during WWI when he was required to leave Nauru by the Australian occupying forces as he held a German passport – Nauru having been a German colony between 1888 and 1914. As an Alsatian, his citizenship status was German until 1918, then, when Alsace-Lorraine reverted to French control, he became a French citizen. He was recognized as an expert on the Nauruan language and all things Nauruan. His is the 1936 *Nauru Grammar* (apparently handed to the Nauru Administration in 1937).[2] On the basis of Aloys Kayser having died in 1944, I am of the mind that the 1976 New Testament was actually ready for publication prior to the occupation of Nauru by the Japanese in 1942.

There is uncertainty about the dialect situation on Nauru prior to German annexation. What is known is that in pre-colonial days there were two alliances, splitting the island into a northern alliance centered on Ewa (which included at the time what are now Nibok, Uaboe, Baitsi,

Ewa, Anetan, Anabar, Ijuw, and half of Anibare districts), and a southern alliance centered on Meneng (which included at the time what are now half of Anibare, Meneng, Yaren, Boe, Buada, Aiwo, and Buada districts), while Denigomodu usually allied itself to Buada. Whether this split was also manifested in a dialectal way is not known. [3]

It is of interest that Delaporte set up his mission in the pre-colonial southern alliance area (Orro hamlet being situated in present day Boe district), while the Catholic mission that Kayser joined was located in the pre-colonial northern alliance area (Ana hamlet being situated in present Ewa district). So, if there were dialectal peculiarities based on the pre-colonial alliance areas, these may have been reflected in the Nauruan of Delaporte and Kayser.

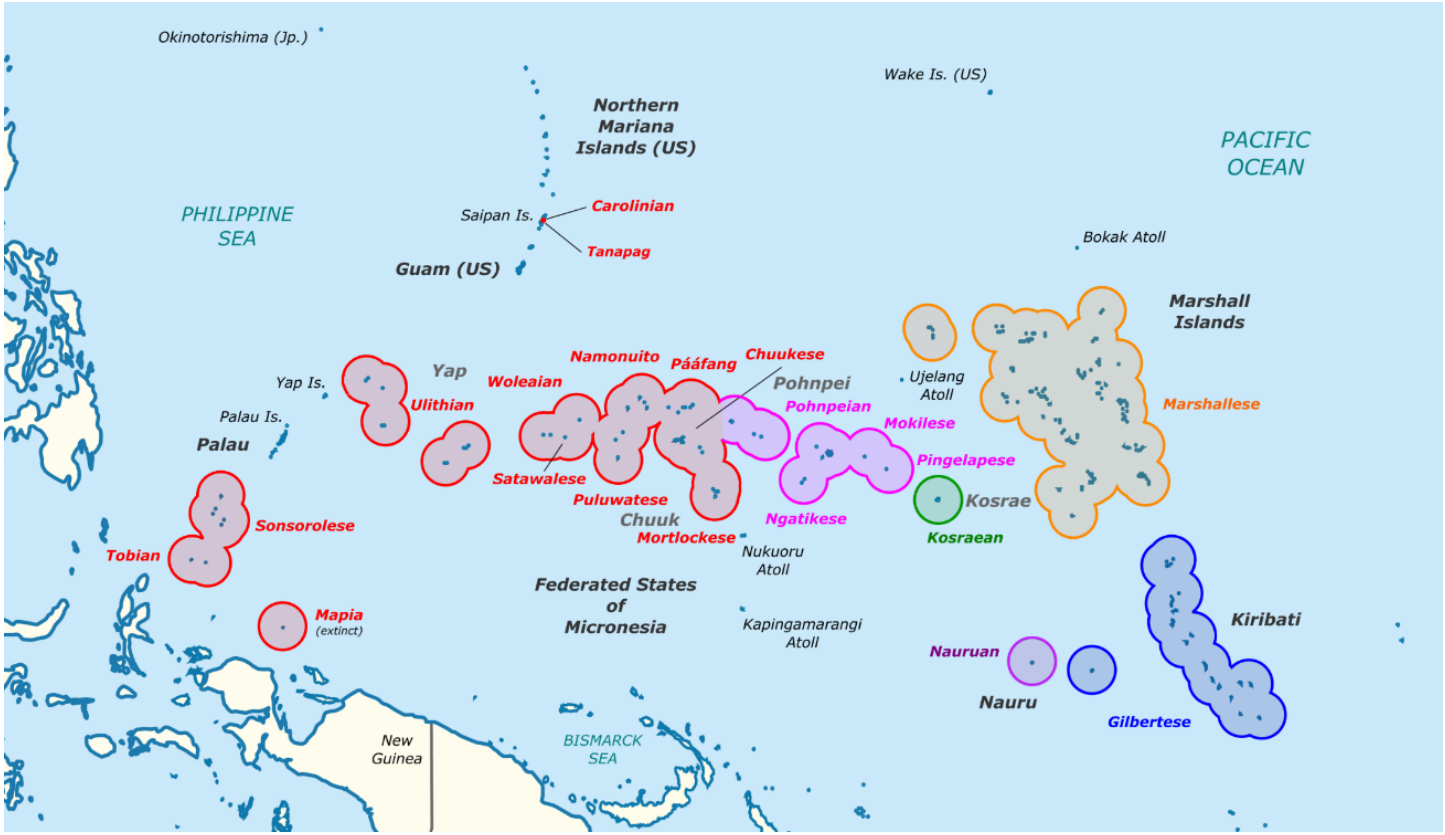
With the passing away of the WWII generation, Nauruan has been undergoing change. The complex demonstrative system that was current in the first half of the 20th century has undergone simplification in that many of the classifiers related to traditional Nauruan culture and as these traditional aspects of culture have fallen into disuse, so have the classifiers. Johnson noted this is her 2002 work.

The Nauruan language itself is recognized by linguists as being a divergent member of the Micronesian language family – itself a division of the Oceanic Group within the extensive Austronesian language family. [4] As far back as 1986, Frederick H. Jackson intimated that both Nauruan and Kosraean were the earliest outposts of what became the Micronesian language family. [5]

Nauru is a small island of circa 21 square kilometers (8.1 square miles) almost straddling the Equator in the Western Pacific. Until German annexation in 1888 Nauru was a sovereign polity, although it had had a small number of European/American residents of various moral propensities from the 1830s.

The first census taken by the German Imperial authorities enumerated 1,294 islanders. However, the population prior to European contact would have been significantly greater. Paul Hambruch in his work on Nauru in 1910 (Ergebnisse Der Südsee-Expedition 1908-1910: II. Ethnographie: B. Mikronesien, Band 1: Nauru, 1 Halbband. Hamburg: L. Friederichsen & Co., 1914, pages 59 – 62) obtained the names of some 169 hamlets (homesteads), 40 of which were uninhabited in 1910. So, the pre-contact population may have been nearer 2,500 during draught free periods and barring natural disasters like tsunamis or cyclones. Like all of the Pacific islanders, the population collapsed with the introduction of influenza varieties unknow to them, as well as Measles and Smallpox. Similar stories of population collapse have been recorded for the Iles Sous-le-Vent in the the Society Islands (100,000+ down to 8,000 in a fifty year period); the Marquesas Islands (circa 100,000 down to 12,000 in a fifty year period; Hawai'i (300,000+ down to 190,000 in a fifty year period) (see Sodter, F. 1993. L' Histoire Démographique. Atlas de la Polynésie Francaise. Institut français de recherche scientifique pour le développement en coopération; Robert C. Schmitt. 1971. New Estimates of the pre-Censal Population of Hawaii. The Journal of the Polynesian Society Vol.80, No. 2.)

Map 1. Map of Micronesian Language Family (https://commons.wikimedia.org/wiki/User:Tyk)



2. Current Status of Nauruan.

The Nauruan language is confined to the island of Nauru (an independent republic since 1968), though there are small communities of Nauruans in neighbouring countries (Australia, Fiji, New Zealand among others).

No mention of the Nauruan language is made in the Constitution of Nauru (1968), but, as Xavier Barker has noted:

"….it appears to have become the *de facto* official language in government, the media and education without any legal support".
(Barker, Xavier. 2012. English Language as Bully in the Republic of Nauru. In: English Language as Hydra: Its Impacts on Non-English Language Cultures , Rapatahana, Vaughan and Pauline Bunce (editors). Volume 9 of Linguistic Diversity and Language Rights)

Concerns exist that the lack of state sponsorship and the lack of Nauruan language classes in the schools is threatening Nauruan, as well as the possibility of the creolization of Nauruan through English. See the May 25, 2021 article at https://www.loopnauru.com/nauru-news/workshop-preserve-nauruan-language-100614

The following figures are taken from the "National Report of Population and Housing – Census 2011".

At the time of the 2011 census, the population of Nauru was 10,084.

According to the 2011 Census, 93% (circa 9,300) of the population of Nauru gave Nauruan as the language of the home.

Although 66% of the population were enumerated as able to speak English, only 2% of the population gave it as the language of the home.

The 2011 Census also revealed that 6% could speak Kiribati, 2% some form of Chinese, although these languages were not necessarily the language of the home.

95% of the population of those 5 years and older were enumerated as able to speak Nauruan.

The population is projected to peak mid century at 11,000, with a steady decline until the end of the century, with a 2100 estimate of circa 5,800 (UN World Population Prospects 2019).

3. Phonetics.

The most recent study in Nauruan phonology is by Kevin Hughes (The Synchronic and Diachronic Phonology of Nauruan: Towards a Defifinitive Classifification of an Understudied Micronesian Language, 2020) and he indicates 7 vowel phonemes.

Table 1. Nauruan Vowels in IPA (adapted from Hughes 2020:15).

	Front	Central	Back
High	i	ɨ	u
Mid	e	[ʌ]*	o
Low	æ	a	

* Hughes 2020 uses the IPA symbol [ɐ] for [ʌ]. He considers it to be an allophone of /a/.

The Consonant inventory allows for at least 23 phonemes.

Table 2. Nauruan Consonants in IPA (adapted from Hughes 2020:15).

	Bilabial	Alveolar	Palatal	Velar
Stop	pʲ bʲ pˠ bˠ	t d tʃ dʒ		k g kw
Nasal	mʲ mːʲ mˠ mːˠ	n		ŋ
Glide			ɻ j	w
Rhotic		r ř		

3.1. Description of Consonant Phonemes.

The following description of Nauruan consonant phonemes has been adapted from Hughes 2020:16–100.

/p^j/ voiceless palatalized bilabial stop

[p] before /i/ and /e/

intervocalic lengthening

/b^j/ voiced palatalized bilabial stop

[b] before /i/ and /e/, and word-final

intervocalic frication possible [β, $β^j$]

phrase final [p]

/pˠ/ voiceless velarized bilabial stop

[p] before /o/ and /u/, and word-final

velarization optional before the central vowels /a/ and /ɨ/

intervocalic lengthening

/bˠ/ voiced velarized bilabial stop

[b] before /o/ and /u/

[p] in phrase-final position

velarization optional before central vowels /a/ and /ɨ/

/t/ voiceless apical stop

intervocalic lengthening

/d/ voiced apical stop

[t] in phrase final position

/tʃ/ voiceless palato-alveolar affricate

only before /i/

/dʒ/ voiced palato-alveolar affricate

only before /i/

/k/ voiceless velar stop

Intervocalic lengthening

/g/ voiced velar stop

[k] in phrase final position

can surface as [ɣ] intervocalically

/kʷ/ voiceless velar stop, secondary labialization

/mʲ/ palatalized bilabial nasal

[m] before /i/ and /e/, and word final

/mːʲ/ geminate palatalized bilabial nasal.

[mː] before /i/ and /e/, and word final

/mˠ/ velarized bilabial nasal

[m] before /o/ and /u/ and word final

velarization optional before central vowels /a/ and /ɨ/

/mːˠ/ geminate velarized bilabial nasal

[mː] before /o/ and /u/

velarization optional before central vowels /a/ and /ɨ/

/n/ apical alveolar nasal

/ŋ/ velar nasal

/w/ rounded labiovelar glide

/j̟/ palatal consonant with light to moderate frication which is variably absent; [j̟] ~ [j]

/j/ palatal approximant

/r/ alveolar trill

fortis trill /ř/

3.2. Some Observations of Sound Changes in Nauruan during the 20th Century.

There are several sound changes and changes in syntax that have occurred in Nauruan since the first half of the 20th Century, which may be due to the influence of English and/or the unfortunate loss of many of the language gatekeepers during the 2nd World War. [6] The governments of Nauru since 1945 have not fostered the development of Nauruan as a literary medium, nor is it taught in Nauruan schools.

Among the changes are:

1. The 'monophthongization' of the dipthongs [ai, ae] to [e]: i.e.

   'aiquen', one > ekwen

   'aiju', three, > e̯ju

   'aijimo', five > e̯jimʲo

   'aeiu', seven > eiju

   'ngain', his/her child > ngen

2. The raising of vowels, example:

   ‘eõ [eʌ]’ , ‘not’ > ia [iʌ]

3. ‘-ow’ is simplified to /-o/, example:

   ‘miow’, fear > mʲio [mio]

4. between high vowels, /j/ (which represents the palatal glide) is moving towards a fricated allophone, [ʝ]: e.g. ‘aijimo’, ‘five’ > ‘ejimo’, > ‘eʝimo’. Already in pre-contact Nauruan /j/ had a fricated allophonic variant in certain environments (see NG2) - this is spreading.

5. The diphthongs [ia, io, iu] which normally represented an intial non-syllabic vowel glide [i̯a, i̯o, i̯u] have drifted to [ja; jo; ju]; its sound varies from /j/ to the fricated sound [ʝ], which is gaining the upper hand: e.g.

   ‘ian’, ‘in it’ > [jan/ʝan]

   ‘ion’, ‘an, a’ > [jon/ʝon]

   ‘iut’, ‘Guettarda speciosa’ > [jut/ʝut]

   ijõñ, below > ʝaŋ [ʝʌŋ]

6. /t/ before the high vowel /i/ represents a voiceless affricate [ts], which in contemporary Nauruan has moved towards a voiceless palato-alveolar affricate [ʧ]. /d/ before the high vowel /i/ is the voiced counterpart, [dz], now moving towards [dʒ].

7. The fortis rhotic, which is represented by the glyph /ř/ in Hughes, in contemporary Nauruan appears to be merging with the usual rhotic /r/ in a number of speakers (see Nathan 1973.1:6,7; Hughes 2020:23, 97-100).

8. An instance mentioned by Hughes (Hughes 2020:80) is the confusion on the role of denasalization in the language. Although not all of the rules for denasalization have been ascertained from written records, denasalization usually occurs when a word-final /n/ is followed by a high vowel. However, it has been observed in contemporary Nauruan that word-final /n/ is being regularly denasalized to /t/, to the point that many are uncertain when a final /n/ should be pronounced with a final /t/; this alternation was not observed in Nauruan during the first half of the 20th Century. It seems to have been present to some degree by the 1970s as Nathan makes an interesting observation (Nathan 1973.1:5) :

   "In word-final position there exists a set of nasal phones whose phonemic identity has not yet been entirely established. They are 'prestopped nasals' [^{b}m] and [^{d}n]…[^{d}n] I have no explanation, except that it may somehow be connected with a morphophonemic alternation between /n/ and /t/."

This obervation by Nathan may be part of the explanation for denasalization.

It could be that in an earlier stage of Nauruan, pre-stopping of /n/ (giving /^{d}n/ began to develop intervocalically at word boundaries, but only where the following word began with the high vowels /i/ and /e/ . The pre-stopping then developed into the denasalization process observed during the first half of the 20th Century.

Using this hypothesis, a phonological process that took place in an earlier stage of Nauruan may have looked like this:

ben imin weta > be^{d}n imin weta > bet imin weta

[the wing of a bird, literally: hand of thing it flies]

While occuring before the nominal prefix/absolute marker, the denasalization of /n/ to /t/ is not present before all high vowels. For instance, denasalization is not recorded when a word-final /n/ is followed by the initial high vowe /i/ of the locational adverbs *'ine/ina/ /ino'*, 'here,there,yonder'.

With the spread of denasalization in word-final position by analogical levelling, the syntactic reasons for the process are becoming blurred, causing confusion in the minds of the younger cohorts of mother-tongue speakers.

4. Orthography.

Nauruan does not at present have an official orthography, so citations are mainly given in the writing system of the original source. Although an official orthography was gazetted in the official gazette of Nauru (No.47 of 5th November 1938), it has never been implemented.

There have been several orthographies that have been used to write Nauruan. Among these are:

1. Orthography used by Paul Hambruch in his studies on Nauru in 1910.
2. Orthography used by Aloys Kayser in his 1915 “Nuwawit testament obwe me etsimeduw”
3. Orthography used in the 1918 Bible and related Protestant texts.
4. Orthography used by Aloys Kayser in the journal “Anthropos” and related journals.
5. Orthography used by Aloys Kayser in his “Nauru Grammar”.
6. Orthography recommended by the Nauru Administration in 1938.
7. Orthography used by Aloys Kayser in the 1976 New Testament.

4.1. Observations on Kayser's orthographies 1936 and 1976.

Kayser in *Nauru Grammar* (1936) was apparently trying to produce a phonetic record of the Nauruan he heard and was taught. This phonetic transcription is never fully described and even within *Nauru Grammar* there are some variations in the spelling of the same word.

With regard to the consonant inventory, his description lacks any sistematic representation of palatalized and velarized consonants.

There is no systematic description or transcription in the fact that in phrase final position the voicing of oral stops in neutralized:

_b > _p

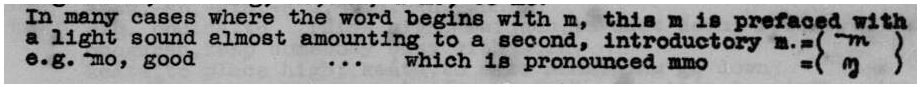
_d > _t

_g > _k

however, he was aware of the variation in some verbs, i.e.

katuk NG175 to strain > katugien NG175 now he has strained it

He was aware of consonant gemination being a feature, but had no systematic description or transcription of it, as this quote shows (NG2):



In many cases where the word begins with m, this m is prefaced with
a light sound almost amounting to a second, introductory m.=(˜m)
e.g. ˜mo, good ... which is pronounced mmo =(ŋ)

Kayser was also aware of a “fleeting slide vowel” (NG3) in ‘*aijimeo*’, ‘5’. But there’s no indication he was aware of the distinction between of the palatal and velar /m/.

The orthography adopted in the 1976 New Testament is a much simplified system.

all diacritics are removed from vowels:

[ä] is converted to [e]

[i̱] is converted to [u]

the velar nasal [ṅ] is converted to [ng]

the voiceless velar stop [q] is invariably converted to [kw]

4.2 Observations on the Orthography of the 1918 Bible.

The orthography reduces the sound system of Nauruan to its absolute necessary parts, but one that a native speaker would be able to contend with, just as an English or French speaker contends with a very outdated and unphonetic/unphonemic writing system.

It uses 8 letters to cover the vowels.

The letter **'a'** represents both /a/ and /æ/.

The letter **'ã'** represents an allophone of /e/ in most cases.

The letter **'õ'** represents [ʌ] which the latest studies indicates is an allophone of /a/.

The letter **'ũ'** represents /ɨ/ (a central unrounded vowel) in most cases.

On the consonantal side, there is no apparent understanding of velarized versus palatalized consonants, consonant gemination, or word-/phrase final devoicing/simplification.

The letter **'ñ'** represents the velar nasal /ŋ/.

The letter **'q'**, or the combination **'qu'** represent /kw/.

The letter '**j**' represents the palatal glide.

The combination **‘tsi’** is usually written ‘ti’ in other orthographies as /t/ only appears as an affricate before /i/.

The 1918 Bible also uses some orthographic conventions, among which:

(a) The translators use ‘ã’ to represent the 3rd Person Singular Dependent Pronoun *‘e’* when the verb phrase it belongs to is impersonal.

(b) The translators use ‘A’ (capital ‘a’) to represent the 1st Person Singular Dependent Pronoun **‘a’**.

(c) Where a verb heads a verb phrase and has no overt person maker, it is by default 3rd Person, but the translators overcompensate by often putting a ‘ghost’ vowel to indicate it is a 3rd Person actor. When *‘ma’*, *‘and’* and *‘bwe’*, *‘for’* precede a vowel-initial verb in such a situation, the translators often delete the vowels of *‘ma’* and *‘bwe’* (which is done is spoken Nauruan) but mirror the initial vowel of the verb or any ‘ghost’ vowel the translators decided on including, so you can end up with a ‘dummy’ vowel and a ‘ghost’ vowel, e.g.

mõ õ õmeata, ‘and he brought out’ , actually represents *m’ õmeata*

(d) When a final consonant of one word meets an initial consonant of the following word in a phrase, Nauruan usually interposes an epenthetic vowel (a non-syllabic “schwa” vowel /ə/) between the two consonants if the combination of the two consonants is, as Rebecca Morley observed:

“sequences that are disallowed or dispreferred within the language.” (see her article “Consonant Epenthesis”, https://www.oxfordbibliographies.com)

The translators do not consistently show the epenthetic vowel, and when they do it can be represented by ‘e’ or ‘i’ or ‘o’ or ‘õ’.

4.3. Comparative Table of Nauruan Orthographies.

6. Nauruan Demonstratives: An Overview.

Demonstratives single out a person or an object that a speaker is referring to and indicate the nearness or remoteness of it from the speaker.

Demonstratives in Nauruan show three degrees of proximity, i.e.:

1. proximal (near the speaker),
2. medial (away from the speaker/near the hearer),
3. distal (away from both the speaker and hearer).

The demonstratives appear in several forms - from a simple (or, base) form through to expanded forms.

Over time, Nauruan developed demonstratives in the following eight domains, in addition to the original general demonstratives:

Animate Demonstratives

Gender-specific Demonstratives

Animate Demonstratives incorporating numeral functions

Gender-specific Demonstratives incorporating numeral functions

Direct address (vocative) demonstratives

General Cardinal Numerals incorporating demonstrative functions

Classifiers incorporating demonstrative functions

Classifiers incorporating numeral and demonstrative functions

As previously explained in Section 4, due to there being no official orthography, the spellings found in the sources are generally used in the tables and examples.

7. General Demonstrative.

The General Demonstrative has five sets, each with sub-sets:

1. Simple (or Base) Form

    1a. Augmented Simple Form

2. Emphatic Form

    2a. Augmented Emphatic Form

3. *min*- Non-Emphatic Form (in this study abbreviated to NEI)

    3a. Syncopated Form

4. *bit*- Non-Emphatic Form (in this study abbreviated to NEIII)

    4a. Syncopated Form *mu*- Non-Emphatic Form (in this study abbreviated to NEII)

5. *mu*- Non-Emphatic Form

    5a. Syncopated Form

7.1. General Demonstrative: Simple (or Base) Form

In *Nauru Grammar* (NG11,38) the simple (or, base) forms are referred to as "shortened" forms but in this analysis they are taken to be the base forms from which all the other general demonstratives developed.

Table 4. Composition of General Demonstrative: Simple (or Basic) Form.

	Singular			Plural		
Spatial Function↓	Singular Marker	Spatial marker	English gloss	Plural marker	Spatial marker	English gloss
Proximal	u	ne	this here	a	ne	these here
Medial	[*u	na]	that there	a	na	those there
Distal	u	no	that over there	a	no	those yonder

Although the form **una* is unattested, there is a reason for positing it, i.e. the non-emphatic medial singular demonstrative '*mituna'*.

'*mituna'* is derived from the posited form **una* thus:

**una > *euna [an augmented form]*
↓
min [marker of the non-emphatic demonstratives] + euna > mit.una [in accordance with the Nauruan denasalization phonological process]

The singular medial form of the simple demonstrative, '*ia'*, appears not to fit in with this analysis.

It could be that *ia* is a syncopated form of the earlier **euna*, or a reflex of **i-na* (the Proto-Malayo-Polynesian reconstructed form).

This table has strong affinities to the locational adverbs of Nauruan, as show in the table of locational adverbs:

Table 5. Nauruan Locational Adverbs.

Spatial Function↓	Locative Particle	Spatial marker	English Gloss
Proximal	i	ne	here
Medial	i	na	there
Distal	i	no	yonder

The spatial markers reflect closely the Proto-Oceanic spatial locators that have been reconstructed (Ross 1988): *ne (near speaker), *na (nearaddressee), and *no (distant from both speaker and addressee).

Usage:

The simple demonstratives do not appear to be used independently as demonstrative pronouns, rather they only as act as post-nominal demonstrative adjectives.

The usual order for simple demonstratives is:

Noun + Simple Demonstrative

and the noun is in its basic form, without the absolute marker/Nominal Prefix.

The simple demonstratives are not used a relativizers.

The simple singular demonstratives can be used for any noun, whereas the plural forms are used for inanimate nouns only (animate plural nouns make use of the animate demonstrative series).

The status of these simple demonstratives is unclear in contemporary Nauruan.

The simple demonstratives are tabulated below.

Table 6. General Demonstrative: Simple (or Basic) Form.

Number→	Singular	Plural
Spatial Function ↓		
Proximal	une	ane

7.2. General Demonstrative: Augmented Simple Form.

At some stage the singular simple forms of the demonstratives developed an augmented form, whereby a prefix '*e-*' was added, likely a topic marker.

Table 7. General Demonstrative: Augmented Simple (or Basic) Form.

Spatial Function ↓	Prefix	Simple form	Augmented form
Proximal	e	une	eune/iune
Medial	e	*una	*euna
Distal	e	uno	euno/iuno

Although the form **euna* is unattested, there is a reason for positing it, i.e. the non-emphatic singular medial demonstrative *mituna*, as mentioned above (1.2):

**una > *euna [an augmented form]*
↓
min [marker of the non-emphatic demonstratives] + euna > mit.una [in accordance with the Nauruan denasalization phonological process]

The usual order for the augmented demonstratives is

Noun + Augmented Demonstrative.

There appears to be a contradiction in *Nauru Grammar* with regard to the augmented forms. *Nauru Grammar* (Kayser 1936:31) places the augmented forms in his "living beings" category of demonstratives however these forms are used for inanimate as well as animate nouns in both the Nauruan Bible published in 1918 and the *Testament Etimeduw* (New Testament) published in 1976 – the latter work being attributed to Kayser.

The status of these augmented demonstratives is unclear in contemporary Nauruan.

Examples:

25.

31.
ean pascha eune NT 64:2
on+3S.POS Passover AUG+PROX
on this Passover

7.3. General Demonstrative: Origins of the Augmented Simple Form.

This prefix '*e-'* may share a common origin with the '*e-'* particle associated with the indefinite pronoun, Classificatory set, e.g:

eran > e+ra+n = an object of the *ra* classificatory group [CL30, flat objects],

and/or the '*e-'* particle used as the absolute marker/nominal prefix on nouns.

8. General Demonstrative: Later Developments.

The simple and augmented demonstratives have over time become fused with other elements and developed into a number of sets as mentioned previously (at section 7.), i.e. :

1. *nga*- Emphatic Form
   (referred to as "nominative" forms in *Nauru Grammar* (NG31-37; abbreviation E used in this study)

   1a. Augmented Emphatic Form

2. *min*- Non-Emphatic Form (in this study abbreviated to NEI)
   (referred to as "accusative" forms in *Nauru Grammar* (NG31-37)

   2a. Syncopated Form

3. *bit*- Non-Emphatic Form (in this study abbreviated to NEIII)
   (referred to as "accusative" forms in Nauru Grammar (NG31-37)

   3a. Syncopated Form

4. *mu*- Non-Emphatic Form (in this study abbreviated to NEII)
   (referred to as "accusative" forms in *Nauru Grammar* (NG31-37)

   4a. Syncopated Form

All of the demonstratives with emphatic or non-emphatic prefixes may have a range of uses:

as a demonstrative adjective;

as a demonstrative pronoun;

from an almost-neutral function to acting as what approximates to a definite article;

or as a relativizer.

When used as a relativizer it usually lacks the spatial suffix ending, and in this study where a demonstrative lacks the spatial suffix ending this is marked in the interlinear description by a [+] sign, e.g. :

ngan - E+MED.P+

9. General Demonstrative: Emphatic Form.

At some stage in the development of Nauruan the prefix *'nga-'* was added to the simple general demonstratives to form the Emphatic form of the general demonstratives.

The singular forms are used for animate and inanimate nouns, the plural forms for inanimate nouns only (plural animate nouns using the animate demonstrative series).

Table 8. General Demonstrative: Emphatic Form.

Singular emphatic general demonstrative				**Plural emphatic general demonstrative**			
Proximity ↓	Emphatic Prefix	Singular Simple General Demonstrative Form	Emphatic form	Proximity ↓	Emphatic Prefix	Plural Simple General Demonstrative Form	Emphatic form
Proximal	nga/ña	une	ngune ñune	Proximal	nga/ña	ane	ngane ñane
Medial	nga/ña	ia	ngea ñea	Medial	nga/ña	ana	ngana ñana
Distal	nga/ña	uno	nguno ñuno	Distal	nga/ña	ano	ngano ñano

In Kayser's *Nauru Grammar* (NG31-37), these forms are referred to as "nominative" (a grammatical feature not present in Nauruan) , and Kayser implies an 'absent' versus 'present' distinction betwen the Emphatic and Non-Emphatic forms of the demonstratives:

"the forms of the Demonstratives beginning with 'ṅa' are used to denote Persons or things removed, absent, referred to, while the other forms beginning with: mu-, mi, min-, mini- are used to denote Persons or things present." (NG63)

.

It is also probable that the emphatic forms were used to introduce new information into a discourse, and that the non-emphatic forms were used for already-introduced information in a discourse.

The Emphatic forms of the General Demonstrative are used as demonstrative pronouns, as demonstrative adjectives, and as relativizers.

9.1. Use of General Demonstrative: Emphatic Form as Demonstrative Adjective.

32.

amebũna rõ pan a gamar bwe ro kona n mek itũrida ta iat deden ñune Ge 34:22

9.4. Use of General Demonstrative: Emphatic Medial Plural Form '*ngana*' before mental verbs and recording verbs.

There is an overlap with the conjunction *'bwe'* ; I have been unable to discern if there are/were distinct parameters for their separate usage. In Marshallese there are two conjunctions used ('ke' and 'bwe') which are used according to the following matrix:

Table 9. Parameters for usage of Marshallese relativizers 'bwe' and 'ke' (adapted from Heather Willson's 'The Marshallese Complementizer Phrase', 2002).

'bwe' Reportive Complimentizer	'ke' Presuppositional Complimentizer
A speaker uses a reportive complementizer when indirectly quoting an utterance or a mental process of him/herself or of someone else. The truth of this indirect quotation is not certain.	A speaker uses a presuppositional complimentizer when the information in the embedded clause is considered "old" or something the speaker already knows to be true.

The following examples show the overlap between the 1918 Bible and the 1976 New Testament. As a general observation, the conjunction *'bwe'* is far more common with mental and recording verbs in the 1918 Bible.

Table 10. Overlap in usage of 'bwe' and 'ngana' with Nauruan mental and recording verbs 1918 Bible versus 1976 New Testament.

1918 Bible	1976 New Testament
87a.bwa amwaim **tsiet bwe** etsimine waion Ñait eñame eat eb in etad dūra Matt 9:6 but you should know that the Son of Man has authority on earth for the forgiving [of] sins	87b. bwe mwaim **tied ngana** etimine oaeon amea Ngait angame eow eat eb bwe nim ead idura Matt 9:6 1976 but you should know that the Son of Man has authority on earth that he may forgive sin
88a. amwa **tsiet bwe** wañara temoniba heiden ri ta moniba eara Matt 20:25 you know that the rulers of the Gentiles lord it over over them	88b. mwa ogiten **tied ngana** amebuna monibait engame re earangameiy engame Matt 20:25 1976 you have known that the rulers of the peoples they are harsh with the people
89a. ama **tsiet bwa** auwe iduwen Matt 22:16 we know that you are true [truthful]	89b. ama ogiten **tied ngana** wo pwat iduwen Matt 22:16 1976 we have known that you speak the truth
90a. amwa **tsiet bwe** etũreten naga ibũm in kũñijow Matt 24:32 you know that the day of heat is about to draw near	90b. mwa **tidien** ngaga **ngana** etureten bita edae in kungiyow Matt 24:32 1976 you already know that the time of heat is now drawing near

91a. bwa A **tsiet bwa** amwar õni Jesu Matt 28:5 for I know that you two look for Jesus	91b. a ogiten **tied ngana** mwar oreit onani amea Jesus Matt 28:5 1976 I have known that you two are looking for Jesus
92a. ñaga Pharisãer rõ **kaiõt bwõ** õ õepoijien mwin amebũna Sadducãer, re ebwepon Matt 22:34 when the Pharisees heard that he had shut the mouths of the Saducees, they then gathered together	92b. amebuna pharisea ngaga ro **kaiyot ngana** dimwa-woten mura ngabuna Sadducea, me re epwepwon Matt 22:34 1976 those Pharisees, when they heard that he had completely shut the mouth of the Saducees, they gathered together
93a. ñag õ **kaiõt bwe** ei Jesu dei Ṇazareth, a aeuwak Mark 10:47 when he heard that it was Jesus the Nazarene, he cried out	93b. ngaga amea **kaiyot ngana** eiy amea Jesus in Nazareth me yeida me kuridaw ituga Mark 10:47 1976 when the man heard that it was Jesus of Nazareth, he started and cried out

There are fewer instances where the 1918 Bible and the 1976 New Testament agree on the relativizer:

Table 11. Agreement in usage of 'bwe' and 'ngana' with Nauruan mental and recording verbs 1918 Bible versus 1976 New Testament.

1918 Bible	1976 New Testament
94a. wo **tsiet ñana** Pharisãer ra ariwan ñaga rõ kaiõt mũñana eñõg? baptism declares to everyone its being known/ baptism declares to everyone the knowledge of it that you have already given yourself to Jehovah

9.5. Origins of the Emphatic Form.

The emphatic demonstratives have the form

'nga' + simple form of the General Demonstrative.

This prefix, '*nga'* , appears elsewhere in Nauruan, i.e. in the personal pronoun system, with the emphatic personal pronouns, e.g.:

ngeiy < nga + eiy , Emphatic Prefix + 3rd person singular Independent Personal Pronoun

The prefix '*nga'* is also found in other Austronesian languages, hence:

Kiribati

In the Personal Pronoun domain:

i, 1st singular personal pronoun	> *ngai* [emphatic form]
ko, 2nd singular personal pronoun	> *ngkoe* [emphatic form]
kam, 2nd plural pronoun	> *ngkamii* [emphatic form]

North Ambrym (Vanuatu)

In North Ambrym, '*nge'* serves as a topic marker, e.g. :

tenya	kon	nge	a
intestine	taboo	topicalizer	proximate

these are taboo intestines
(Franjieh, 2012:92)

Toqabaqita (Solomon Islands)

"the identifier *nga* …serves to express the speaker's conviction that the eater of the pig was a person rather than, for example, a dog" (Lichtenberk 2008, Vol. I:254), e.g. :

botho baa, nga wane qe qani-a
pig that identifier person 3S.Non-Future eat-3S.OBJ
the pig, a person ate it (Lichtenberk 2008, Vol. I:254)

Mekeo (Papua New Guinea)

the Personal Pronoun domain:

lau, 1st singular personal pronoun	> l*au- ŋa* [emphatic form]
oi, 2nd singular/plural	> *oi- ŋa* [emphatic form]
isa, 3rd singular/plural	> *isa-ŋa* [emphatic form]
iʔa, 1st plural inclusive	> *iʔ-ŋa* [emphatic form]
lai, 1st plural exclusive	> *lai- ŋa* [emphatic form]

(Jones 1998)

Palauan

See '*Origins of Palauan Intrusive Velar Nasals'* by Juliette Blevins and Daniel Kaufman in Oceanic Linguistics 51(1):18-32 (2012) which attribute the Palauan 'intrusive velar nasal' to an "ancient formative *ŋa 'emphatic' ".

10. General Demonstrative: Augmented Emphatic Form.

The Augmented General Demonstratives (section7.2) have acquired emphatic forms as tabulated below.

Table 12. General Demonstrative: Augmented Emphatic Form.

Proximity ↓	Composition		End form
	Prefix	Augmented Simple General Demomstrative	
Proximal	nga- ña-	eune	ngaeune ñaiune
Medial	UNATTESTED		
Distal	nga- ña-	euno	ngaeuno ñaiuno

The status of these augmented demonstratives is unclear in contemporary Nauruan.

Examples:

117.
ñaiune deden owõñen Ge 6:15
E+AUG+PROX manner+CONS fashion+3S.POSGER
this is the manner of its being fashioned/this is how it is fashioned

118.

10.1. Origins of the Augmented Emphatic Form.

The General Demonstrative Augmented Emphatic Form has the same historical journey as that described for the General Demonstraive Augmented Form (Section 7.2.1.) and the General Demonstrative Emphatic form (Section 7.5.).

11. General Demonstrative: Non-Emphatic Form.

As mentioned at Section 7.3. , the General Demonstrative has been expanded to produce three non-emphatic sets:

1. *min*- Non-Emphatic Form (in this study abbreviated to NEI)
(referred to as “accusative” forms in *Nauru Grammar* (NG31-37)

3a. Syncopated Form

2. *mu*- Non-Emphatic Form (in this study abbreviated to NEII)
(referred to as “accusative” forms in *Nauru Grammar* (NG31-37)

3a. Syncopated Form

3. *bit*- Non-Emphatic Form (in this study abbreviated to NEIII)
(referred to as “accusative” forms in Nauru Grammar (NG31-37)

4a. Syncopated Form
In this study, the non-emphatic prefixes are derived from the fusion of the word *‘min’, ‘thing’*, to the General Demonstrative Simple and Augmented Simple forms.

These forms often have very little demonstrative function acting, rather, like a definite article.

The incorporation of *'min', 'thing'*, into the demonstrative system is not unique to Nauruan. This is also observed in the Micronesian language of Satawal Atoll.

Table 13. Some Satawalese 'min' demonstratives (adapted from Roddy 2007:67)

***min-* + demonstrative**	**Meaning**
min-ne	something proximal to speaker in view of speaker and hearer
min-na	something proximal to the hearer in view of speaker and hearer
min-i-we	a definite object in mind but not in view of speaker or addressee
min-i-ka or mini-kka	de-emphasized objects near speaker
min-aan	that which is over there

In Nauruan, *'min'* when fused with other elements, has undergone phonological changes.

This study was originally published online in 2014, and the conclusions I arrived at then and have kept in this revised edition differ in several respects from those arrived at by Hughes' 2020 "The Synchronic and Diachronic Phonology of Nauruan: Towards a Definitive Classification of an Understudied Micronesian Language (pages 261-264).

12. General Demonstrative Non-Emphatic *min*- Form (NEI form)

In the singular, the *'min'* fused with the General Demonstrative Augmented Simple forms (Section 7.2.) and underwent denasalization (a Nauruan phonological process), i.e. :

min + eune *> mitune*

min + euna *> mituna*
↓
mita (syncopated form)

min + euno *> mituno*

In the plural, the '*min*' fused with the General Demonstrative Simple forms without any modifications.

Table 14. General Demonstrative: Non-Emphatic min- Form (NEI).

Singular Non-Emphatic *min* Demonstrative				
Proximity ↓	Composition		End form	Syncopated Form
	Prefix	Augmented form		
Proximal	min	eune	mitune	Unattested
Medial	min	(*euna – Unattested)	mituna	mita
Distal	min	euno	mituno	Unattested

Plural Non-Emphatic *min* Demonstrative				
Proximity ↓	Composition		End form	Syncopated Form
	Prefix	Plural simple demonstrative		
Proximal	min	ane	minane	mane
Medial	min	ana	minana	mana
Distal	min	ano	minano	mano

The singular forms are used for animate and inanimate nouns; the plural forms are used for inanimate nouns – animate nouns using the animate plural series.

Kayser (NG31) seems to indicate that the singular medial form *'mituna'* was only used for living beings.

The status of these *'min-'* forms is unclear in contemporary Nauruan, except for the syncopated plural forms.

I have been unable to locate any use of the singular *min-* forms (i.e. , the *mit-* forms) in the 1918 Bible, the 1976 New Testament, and other written sources in Nauruan, so I presume the derivative *bit-* forms (Section 7.9.) have overtaken the singular *min-* forms (i.e., the *mit-* forms.)

Examples:

129.

Noah only behold NEI+MED.P & GREAT GPOS+3S.POS rejoice in+3S.POS innards+3S.POS
Noah just beheld those things and his joy was great in his heart

12.1. *min-* Syncopated Form.

The full form of the singular medial form of the *'min'* demonstrative – *'mituna'* - also had a reduced form through syncope, e.g.:

mituna > mita

The status of this syncopated form is unclear in contemporary Nauruan.

The syncopated plural forms are in general use in contemporary Nauruan with inanimate nouns.

Table 15. General Demonstrative: Non-Emphatic min- , Syncopated Plural Form (NEI).

Plural Non-Emphatic *min* Demonstrative				
Proximity ↓	Composition		End form	**Syncopated Form**

many things the Bible has spoken of have happened from the smallest details

13. General Demonstrative Non-Emphatic *bit*- Form, including syncopated forms (NEIII form).

I am suggesting in this study that the element '*bit-'*, is the result of the singular non-emphatic *'min-'* forms (Section 7.8.). In the singular, the *'min'* fused with the General Demonstrative Augmented Simple forms (Section 7.2.) and underwent denasalization (a Nauruan phonological process), and these fused forms then underwent the phonological process of prestopping at an earlier stage of Nauruan, and then a further process of simplification, i.e. :

min + eune > *mitune*

↓

[b]mitune

↓

bitune

↓

tune (syncopated form)

min + euna > *mituna* **or** >*mituna*

↓ ↓

[b]mituna *mita (syncopated form)*

↓ ↓

**bituna* *[b]mita*

↓ ↓

bita (syncopated form) *bita*

min + euno > *mituno*

↓

[b]mituno

↓

bituno

↓

tuno (syncopated form)

The resultant *mit*- forms and *bit*- forms continued in use into the early 20th century. However, I have been unable to locate any use of the *mit*- forms in the 1918 Bible, the 1976 New Testament, and other written sources in Nauruan, so I presume the *bit*- forms have overtaken the *mit*- forms.

A similar instance of pre-stopping is attested in the classifier 8 doublet '*bweti*' ~ '*mweti*', the classifier for flexible objects Classifier 7 [18/19] ; and the classifier 25[31] '*mweiy*' , *'dung heap, heap of excrement'* in relation to the noun '*bwiya' , 'excrement'.*

It is of interest to note that when Geoffrey S. Nathan was studying the Nauruan language in the early 1970s, he noted the existence of the prestopped nasal [^{b}m] in certain situations in the speech pattern of his informant, Mr. Alex Deiye (Nathan 1973.1:5).

Table 16. General Demonstrative: Non-Emphatic bit- Form and their syncopated forms (NEIII).

Proximity ↓	Full Form	Syncopated Form
Proximal	bitune	tune
Medial	(*bituna – Unattested)	bita (or via mita)
Distal	bituno	tuno

It is unclear if *'bita'* arose as a syncopated form of an earlier, unattested **bituna*, or arose as the result of prestopping with the already existing syncopated form of *'mituna'*, i.e. *'mita'.*

These forms are used for animate and inanimate singular nouns. These forms are still in use.

13.1. Use of General Demonstrative Non-Emphatic *bit-* Form (NEIII) as Demonstrative Adjective.

14. General Demonstrative Non-Emphatic *mu*- Form, including syncopated forms (NEII).

This is a late development as the *mu*- suffix is attached to the Emphatic Plural foms of the General Demonstrative set.
In this study it is proposed that the *mu*- suffix is a late photological development of the *min*- suffix, i.e. :

min + ngan- > mungan-

These forms are only used for inanimate nouns. These demonstratives are still in use.

Table 17. General Demonstrative: Non-Emphatic mu- Form (NEII).

mu Non-Emphatic Demonstratives				
Proximity ↓	Composition		End form	Syncopated Form

14.3. Use of General Demonstrative Non-Emphatic *mu*- Syncopated Form NEII).

The *mu*- forms also have reduced forms through syncopation, e.g.:

mungana > munga, etc.

These appear to be disused in contemporary Nauruan.

and Joseph then went and then looked for those, his brothers. And those ones, when the had seen him when he was yet far off …

17. Spread of Demonstrative Features.

Over time, the spatial suffixes of the simple general demonstratives, and the emphatic and non-emphatic prefixes of the general demonstratives came to be fused with other elements in the Nauruan language, so that by the early 20th century Nauruan had developed demonstratives in the following eight domains, in addition to the original general demonstratives:

1. Animate Demonstratives
2. Gender-specific Demonstratives
3. Animate Demonstratives incorporating numeral functions
4. Gender-specific Demonstratives incorporating numeral functions
5. Direct address (vocative) demonstratives
6. General Cardinal Numerals incorporating demonstrative functions
7. Classifiers incorporating demonstrative functions
8. Classifiers incorporating demonstrative and numeral functions

The only divergence is that a different set of the spatial suffixes is used when the numeral system is incorporated into the demonstrative system. The only exception being in early fossilized animate numerals from 1 to 4. The 'normal' set is ***-ne, -na, -no***, but these use a secondary set, ***-e̱, -e̱a, -e̱o***.

18. Animate Demonstrative.

The singular General Demonstratives detailed above (Sections 7 – 15) are also used for animate beings without reference to gender.

For the Animate Plural Demonstrative, a fusion has occurred with the element *'bun'* (phonemiced as [b^{j}un] in Hodges 2020:262).

19. Animate Demonstrative Plural.

The plural forms for animate beings without reference to gender are based on the fusion of the demonstrative/spatial elements with the element '*bun'*, animate plural marker.

The root '*bun'* is also found in the word '*ibun'*, *'some/others'* (phonemiced as [ib^{j}un] in Hodges 2020:262).

Table 20. Animate Demonstrative, Plural Forml.

Proximity ↓	Form →	Simple Form	Emphatic Form (E)	Non-Emphatic *min-* Form (NEI)	Non-Emphatic *mu-* Form (NEII)
Proximal		bune bũne bine	ngabune ñabũne	minibune minibũne mibune	mubune mũbũne
Medial		buna bũna bina	ngabuna ñabũna	minibuna minibũna mibuna	mubuna mũbũna
Distal		buno bũno bino	ngabuno ñabũno	minibuno minibũno mibuno	mubuno mũbũno

In this study the *'bun'* element is glossed as 'ANIM.P' in the interlinear examples.

Examples of Animate Plural Demonstrative:

229.

20. Gender Specific Animate Demonstratives.

Further animate demonstratives are formed where the gender of those identified is required to be highlighted, so there are male specific demonstratives and female specific demonstratives.

21. Use of *'amen'.*

In this study, *'amen'* is glossed as 'male (+CONS – Construct Suffix)'.

However, where the element *'amen'* occurs in the very limited set of fused animate cardinal numerals and animate demonstrative numerals it is glossed as 'ANIM – Animate', and the forms are used for either gender.

Hodges (Hodges 2020:264) - who phonemicizes *'(a)men'* as [-mʲen] - suggests that it is the reflex of Proto-Micronesian *manu, 'living creature'.

If this is the case, *'(a)men'* was only later re-analyzed to mean 'male (+ Construct Suffix)', as this is the meaning now associated with it - as in the oft-used determiner phrase '*amen* + N or V', 'man for X, man associated with X'. In this newer, restricted meaning of 'male', further developments occurred in the demonstratives, whereby the element *'amen'* (which by now only had its modern meaning of 'male') was suffixed to the General Demonstrative: Augmented Simple forms for the singular and to the Animate Plural marker '*bun'* for the plural forms to produce male-specific demonstratives (Section 22) , and *'amen'* was suffixed to the pre-existing Animate Demonstrative Numerals to produce male-specific demonstrative numerals (Section 27).

Examples of *'amen'* with its 'Animate' function:

Animate Cardinal Numeral:

a, Numeral Prefix + ro, two + amen > arumen, two living beings (without reference to gender)

a, Numeral Prefix + yu, three + amen > aiyimen, three living beings (without reference to gender)

a, Numeral Prefix + a, four + amen > amen, four living beings (without reference to gender)

The vowel sandhi exibited by the numeral root forms is not understood by this writer.

From these are derived the simple forms of the animate demonstrative numeral which can be combined with most of the prefixes that developed in the General Demonstrative set (i.e. nga-, min-, mu-) – see Section 27.

Examples of *'amen'* with its 'Male' function (See Sections 22 and 28):

amen + rumena > amerumena, those two males

amen + yimena > ametiyimena, syncopated form: ametsimena, those three males

amen + eune > ametune, this male

22. Male Demonstrative.

The Male Specific Demonstratives are fused forms based on two markers:

'amen', fused with the General Demonstrative: Augmented Simple forms (see Section 7.2) ;

'amen', fused with '*bun*'; this animate plural marker has already been met with in Sections 18. And 19 .)

Table 21. Male Demonstrative, Singular Form.

Proximity ↓	Composition		Fused Form	Syncopated Form
	Male marker	General Demonstrative: Augmented Simple		
Proximal	amen	eune	ametune	amune
				Other Syncopated Form
				tune
Medial	amen	euna	(*ametuna – Unattested)	ameta
				Further Syncopated Form
				amea
Distal	amen	euno	ametuno	amuno
				Other Syncopated Form
				tuno

Table 22. Male Demonstrative, Plural Form.

Proximity ↓	Composition			Fused Form	Syncopated Form
	Male marker	Animate Plural Marker	Spatial Suffix		
Proximal	amen	bun, bũn	ne	amebune, amebũne	ambine, bune
Medial	amen	bun, bũn	na	amebuna, amebũna	ambina, buna
Distal	amen	bun, bũn	no	amebuno, amebũno	ambino, buno

The origin of the singular forms is(but see Footnote 1 Page 407)

Singular Proximal forms

amen + eune > ametune [in accordance with the Nauruan denasalization phonological process]
↓
ametune > amune [via syncopation]
↓
tune [via syncopation]

Singular Medial forms

*amen + *euna > *ametuna [in accordance with the Nauruan denasalization phonological process]*
↓
**ametuna > ameta [via syncopation]*
↓
amea [via syncopation]

Singular Distal forms

amen + euno > ametuno [in accordance with the Nauruan denasalization phonological process]
↓
amuno [via syncopation]
↓
tuno [via syncopation]

The only difference between the General Demonstrative derived forms (*nga-*, *min-*, *mu-*) (Sections 7 - 15) and the Male Demonstrative appears to be that the Male Demonstrative set is not used as relativizer.

Unless special emphasis is evident, when the Male (and Female) Demonstrative are followed by a proper name or a kinship noun, the gender specific demonstratives appear to act with little demonstrative function, they merely signify the gender/gender and number of the named individual/s and do not require an English translation, or if one is needed, the definite article may be appropriate.

23. *rar* Demonstrative (Secondary Singular Male Demonstrative).

There is a secondary singular male-specific demonstrative, only in the singular.

This element is fused with the General Demonstrative Simple Singular forms.

As with the Male Demonstrative set, it is not used as a relativizer.

Kayser lists '*rar*' in his table of Personal Pronouns with some funcion as 3rd person singular independent pronoun and objective pronoun (1936:18).

Table 23. rar Demonstrative (Secondary Singular Male Demonstrative).

Proximity ↓	Composition	Fused form

for this my son here was already dead, and he is now alive again

338.
ogen garõ ñea bwe awe wo tsiet ñana ogen, me ada memak Members ine
finish+PERF clear E+MED for 2S.IND 2S.DEP know E+MED.P finish+PERF & 1P.INC.IND all members here

339.
añ tsiet rarune õrin redo ñei hsd 13p
1P.INC.DEP know *rar*+PROX IMM return 3S.IND
so, it is clear that you know that it over, and all our members here, we know this man is about to return

From the very limited recorded examples, the '*rar*' element seems to imply a fondness or close acquaintance (see Johnson 2002:52).

Examples of *'rar'* as a personal pronoun:

340.
wo man oa ijök iö wo ñati' renemi' rar? NG8
2S.DEP wise or no CONDt 2S.DEP reveal dream+CONS *rar*
you are wise or not that you reveal his dream?/ can you interpret the dream of his?

341.

3S.DEP+true *rar*
he is right

342.
ogen rar eo gona dorer bwe "Akumo", ekeow ei ien hsd 13p 19980515 60
finish+PERF *rar* NEG able talk as *Akumo* be.not+DIR 3S.IND AB+female
ok, he cannot talk as "Akumo"; he's not female

24. *angame* Demonstrative (Secondary Singular Male Demonstrative).

As with the 'rar' Demonstrative set, this set is present only in the singular.

'angame' is the word for "person, man". This element is fused with the Augmented General Demonstrative Simple Singular forms. As with the Male Demonstrative set, it is not used as a relativizer.

Table 24. angame Demonstrative (Secondary Singular Male Demonstrative).

Proximity ↓	Composition	Fused form	Syncopated Form
Proximal	angame + eune	angametune	Unattested
Medial	angame + euna	angametuna	angameta
Distal	angame + euno	angametuno	Unattested

The only written example of this demonstrative that I have been able to locate is as follows:

343.
o gaida ṅameta Akǭrǭ bu'e num oụ̣doụ̣do medenan ṅaimar inna aoh! NG220
3S.DEP come.up *angame*+MED Akoro for 3S.DEP MOD ask+RED way+CONS child+1D.EXC.POSS there oh
that Akoro has come up in order to enquire the way of our child there, oh!

The actual paraphrase given by Kayser to the above sentence is "now the stupid Akoro had to come to this very spot to inquire how our child was doing!", which might indicate that the *angame* Demonstrative had a pejorative connotation.

25. Female Demonstrative.

The Female Demonstrative is a fused form based on elements:

(1) ‘*en*’, fused with the General Demonstrative: Augmented Simple forms (Section 7.2) ;

(2) ‘*en*’, fused with ‘*bun*’; this animate plural marker has already been met with in Sections 19 and)

The origin of the singular forms is along the same lines as for the Male Demonstrative (Section 22), i.e. : (but see Footnote 1 Page 407)

Singular Proximal forms

en + eune > etune [in accordance with the Nauruan denasalization phonological process]
↓
tune [via syncopation]

Singular Medial forms

*en + *euna > etuna [in accordance with the Nauruan denasalization phonological process]*
↓
etuna > eta [via syncopation]

Singular Distal forms

en + euno > etuno [in accordance with the Nauruan denasalization phonological process]
↓
tuno [via syncopation]

The marker for ‘female’ is variously written ‘en’, or ‘ein [e̯in]. This is explained by Nathan (1973.1:12) who shows that a non-syllabic vocalic glide can follow /e/, i.e. [*e̯i*]; this would explain why there are two spellings for the ‘female’ seen in the noun for *‘woman’*, ‘*en*’, but which appears as ‘*ei*-‘ in the words ‘*eita*’ and ‘*einibuna*’, amongst others (both fused demonstratives based on ‘*en*’).

Derivation:

‘en, e̯in’, *‘female, woman’* - from Proto-Micronesian *feifine, woman: Kosraean *‘ɛn’*, Kiribati *‘aiine’*, Pohnpeian *‘peyn’*.

Table 25. Female Demonstrative, Singular Form.

Proximity ↓	Composition		Fused Form	Syncopated Form
	Female marker	General Demonstrative: Augmented Simple		
Proximal	en	eune	etune, eitune, ãitune	tune
Medial	en	euna	etuna, eituna, ãituna	eta, eita, ãita
Distal	en	euno	etuno, eituno, ãituno	tuno

Table 26. Female Demonstrative, Plural Form.

Proximity ↓	Composition			Fused Form
	Female marker	Animate Plural marker	Spatial Suffix	
Proximal	en	bun, bũn	ne	enibune einibune ãinibũne
Medial	en	bun, bũn	na	enibuna einibuna ãinibũna
Distal	en	bun, bũn	no	enibuno einibuno ãinibũno

The only difference between the General Demonstrative derived forms (*nga-*, *min-*, *mu-*) (Sections 7 - 15) and the Female Demonstratives appears to be that the Female Demonstratives are not used as relativizers.

Unless special emphasis is evident, when the Female Demonstratives are followed by a proper name or a kinship noun, the gender specific demonstratives appear to act with little demonstrative function, they merely signify the gender/gender and number of the named individual/s and do not require an English translation, or if one is needed, the definite article may be appropriate.

26. *ateb* Demonstrative (Secondary Singular Female Demonstrative).

The *'ateb'* Demonstrative may well be the female counterpart to the *'rar'* Demonstrative (Section 23.), its being used in situations of endearment or close acquaitance (see Johnson 2002:52).

The element *'ateb'* fuses with the General Demonstrative: Simple, Singular forms.

Like '*rar*' (Section 13.) Kayser lists *'ateb'* in his table of Personal Pronouns with some function as 3rd person singular independent pronoun and objective pronoun (1936:18).

Like the other gender-specific demonstratives, it is not used as relativizer.

Table 27. ateb Demonstrative.

Proximity↓	Composition	Fused form

27. Animate Demonstrative Numeral.

The Animate Demonstrative Numeral set is defective. It is based on the Animate Cardinal Numeral, which is also defective. The Animate Cardinal Numeral and Animate Demonstrative Numeral are used for humans (male and female) as well as other living creatures, and some concepts closely allied to human intercourse (such as ‘spirit’, ‘soul’).

Apart from the distinct animate forms given, recourse is made to the General Cardinal Numeral set for enumeration and the Demonstrative Cardinal Numeral for demonstrative functions (see Section 34).

27.1. General Cardinal Numeral.

As all numeral sets derive from the General Cardinal Numeral (except for suppletive forms), the following table sets out the General Cardinal Numeral. The General Cardinal Numeral is itself made up of a Numeral Prefix ‘*ɑ*-‘ followed by the numeral root. This Numeral Prefix is dropped when the numeral takes on demonstrative functions.

The folllowing points should be kept in mind when looking at the following table:

1. The orthographic convention used by Kayser in *Nauru Grammar* in the following table is

   ṅ = velar nasal /ŋ/ (otherwise written [ng] or [ñ]

2. The number '1' is spelt '*aiquön*' in *Nauru Grammar*; however, it is spelt '*aiquen*' in the 1918 Bible and '*aikwen*' in the 1976 New Testament. Hughes phonemicizes it as [ek^{w}en] (Hughes 2020:271).

3. The number '7' is spelt '*aeu*' in *Nauru Grammar*; however, it is spelt '*aeiu'* in both the 1918 Bible and the 1976 New Testament. Hughes phonemicizes it as [eiju] (Hughes 2020:271).

4. The number '8' is spelt '*auiju*' in *Nauru Grammar*; however, it is spelt *'aoju*' in the 1918 Bible and '*aoiyu*' in the 1976 New Testeament. Hughes phonemicizes it as [o̯ju] (Hughes 2020:271).

5. The vowel combination 'ai-' is now usually pronounced /e/, so:

   aikwen > ek^{w}en

   aiju > e̯ju

   aijimo > e̯jim^{j}o

6. The vowel comibation ‘au-, ao-‘ is usually pronounced /o/, so:

   auiju/aoiju *> o̯ju*

7. between vowels, /j/ (which represents the palatal glide) is moving towards a fricated allophone, [j̯]:

   aiju *> e̯ju*

   aijimo *> e̯jimʲo*

   aoju *> o̯ju*

   The exception is with the numerals ‘7’, ‘*aeiu*’, this is not pronounced with the fricated [j̯], Hughes phonemicizes it as [eiju].

8. The number ‘4’, ‘*aeoq, aeoqu-*‘ is phonemicized by Hughes as [æeokʷ] (Hughes 2020:271).

9. In Kayser’s Grammar, ‘5’ is invariably written ‘*ijimeo*’ ; Kayser (NG3) descibes this /e/ in ‘*ijimeo*’ as a “fleeting slide vowel”. ‘5’ is usually spelt ‘*aijimo*’ and is phonemicized as [e̯jimʲo] by Hughes (Hughes 2020:271).

10. The hundreds-suffix is spelt ‘*-uer, -uar*’ by Kayser, but as the 1918 Bible spells this suffix as ‘*-war*’, and the 1976 New Testament spells it as ‘*-wer*’ the ‘*-ue-, -ua-*’ has been taken to be a non-syllabic vowel glide+vowel sequence, ‘*-u̯e- , -u̯a-*’.

11. The vowel sandhi exibited by the numeral root forms and decade suffix ‘*-ma*’ and hundred suffix ‘*-wer*’ is not understood by this writer.

Table 28. General Cardinal Numeral

Units		Decades		Hundreds		Thousands	
1	aiquön aiquen, aikwen	10	ata	100	aibu	1000	araṅa
2	aro	20	anarama ararama	200	arobu		
3	aiju	30	animo	300	aijubu aiyubu		
4	aeoq aeokw	40	amma ama	400	abu		
5	aijimeo aijimo	50	aijima aiyima	500	aijimoo̱er aijimowar aiyimower		
6	aṅo año, ango	60	aṅoma aṅama añoma, angoma	600	aṅoo̱er añowar angower		

7	aeu aeiu	70	aemo	700	aeu̯er aew̆ar aewer	
8	auju aoju, aoiyu	80	aujumo aojumo	800	auju̯er aojuwar aoijuwer	
9	ado	90	aduma	900	adau̯er adaw̆ar adawer	

Note:

1. The differences in spelling reflect those found in *Nauru Grammar*, 1918 Bible and 1976 New Testament.

2. The numerals 20 and 30 appear to be derivations of the original forms, the original forms being used only in the Animate Numeral/Animate Demonstrative Numeral sets. (see Note to Table 29 in Section 27.3)

27.2. Function Vowel with Numerals.

Kayser gives two sets of General Cardinal Numerals (and from these the demonstrative numerals derive).

The first set he calls the “general abstract numeral denoting simply number and used in abstract calculations” and a second set which he calls the “special concrete numeral” which “numbers things” (NG68,70).

The only difference between the two is that the General Cardinal Numeral when used to “number things” (Kayser’s “special concrete numeral”) adds a ‘function vowel’ at the end of the tens, hundreds and thousands (NG:69).

The function vowel at the end of the numeral is either /e/ or /i/.

For numerals ending in /a/ and /o/ the function vowel is /e/

For numerals ending in /u/ the function vowel is /i/

But this function vowel does not applear in compound numerals (NG70).

This function vowel is uniformly present in the conditions described above in :

Animate Demonstrative Numeral, Section 27

Demonstrative Cardinal Numeral, Section 33

Classificatory Cardinal Numeral (not a focus of this study, discussed in passing Section 35.1)

Classificatory Demonstrative Numeral, Section 35.2

Distributive Numeral (not a focus of this study)

and the spatial suffixes *-o̱e*, *-o̱a*, *-o̱o/-u̱e*, *-u̱a*,*-u̱o* follow the function vowel where this is required (except in a few instances).

Examples:

389.

nan õten ia aijumoe? Gen 18:30

UNR how COND three+ANIM+FV

how will it be if there are thirty people?

390.

Isaak õkiãõ ean eb ia, mo o kona bet katubui ean obweni ia Gen 26:12

Isaac cultivated that land and gained also one hundred-fold by that land (*katubui* is from the Distributive Numeral category, which is not part of this study)

391.

ama memak ama nan quaraña mo katubui aw schekel in silber Judg 16:5

1P.INC.IND all 1P.INC.DEP UNR CAUS+1000 & CAUS+100+FV to+2S.OBJ shekel CONS silver

we all, we will effect, each of us, a distribution of 1100 silver shekels to you

(*katubui* is from the Distributive Numeral category, which is not part of this study – this example also does not follow Kayser's statement that the function vowel is dropped in compound numerals, so there must have been some variation in usage)

392.

me omedomedo ura ean aibui eobweni Ac 7:6

& oppress 3P.OBJ on+3S.POS 100+FV AB+year

[and oppress them for one hundred years]

393.
atae ngana dabuk na PC
ten+FV E+MED.P book there
there are ten books there

27.3. Animate Cardinal Numeral.

There are distinct fused forms based on the General Cardinal Numeral with the 'Animate' marker *'amen'* for the the numerals 2, 3 and 4 (see Section 21).

There are also distinct forms for 10, 20 and 30 but these are not based on the *'amen'* marker and so presumably arose at a later stage of Nauruan.

Table 29. Animate Cardinal Numeral.

Animate Cardinal Numeral				
Numeral	Composition			
	Numeral Prefix	Numeral	Animate marker	End result
2	a	ro	amen	arumen
3	a	yu	amen	aiyimen aijimen
4	a	a	amen	amen

<table>
<tr><td>10</td><td colspan="4">Suppletive
oea / waea</td></tr>
<tr><td rowspan="2">20</td><td colspan="4">Suppletive</td></tr>
<tr><td>a</td><td>ro</td><td>ma [decade marker]</td><td>aruma</td></tr>
<tr><td colspan="5">Suppletive</td></tr>
<tr><td>30</td><td>a</td><td>yu</td><td>ma [decade marker]</td><td>aiyumo
aijumo</td></tr>
</table>

The vowel sandhi exibited by the numeral root forms and decade marker *'-ma'* is not understood by this writer.

The origin of the unique form for ten – *oea*/*waea* – is not known.

The 1918 Bible spelling is *waea*; Kayser's spelling NG43,70 is *oäa*; the 1976 New Testament spelling is *oea*.

oä/oe used by Kayser appears to be a digraph to represent the non-syllabic semi-vowel [o̯] followed by [*e*]. The semi-vowel [o̯] is represented by [*w*] in the 1918 Bible – hence, *oag/o̯ag*, 'house' is spelt *wak*, *oereri/o̯ereri*, 'learn' is spelt *wereri*.

The forms for 20 and 30 appear to be the original General Cardinal Numerals. These seem to have been retained only when enumerating humans – and other living creatures - with derived forms being used in general enumeration. Interestingly, the base number 20, *'ruma'* , reappears in the Classificatory Demonstrative Numeral.

Table 30. Comparison of Animate and General Cardinal Numerals 20 and 30.

Animate Cardinal Numeral	General Cardinal Numeral (derived forms)
20 - aruma	20 - anarama
30 - aiyumo/aijumo	30 - animo

Note: The Animate Cardinal Numerals for 20 and 30 follow the usual make-up of the General Cardinal Numeral for decades, i.e.:

Numeral Prefix 'a-'	*+ Numeral root*	*+ decades suffix '-ma'*	
a	*+ ro*	*+ ma*	*> aruma*
a	*+ iyu*	*+ ma*	*> aiyumo*

A suggestion as to how the derived forms used in the Cardinal Numeral set may have arisen is given here:

'ana-' derivational prefix + 20 'aruma'	*> anarama*	
'ana-' derivational prefix + 30 'aiyumo	*> aniyumo*	*> animo , by syncope*

The vowel sandhi exibited by the numeral root forms and decade marker *'-ma'* is not understood by this writer.

27.4. Animate Demonstrative Numeral: Table and Examples.

From these Animate Cardinal Numerals (Table 28) are derived the simple forms of the Animate Demonstrative Numeral which can be combined with all but the *bit-* forms of the prefixes that developed in the General Demonstrative set (i.e. *nga-*, *min-*, *mu-*). The *bit-* set is only used in the singular.

As mentioned in Section 17, the only divergence with the demonstrative system is that a different set of spatial suffixes is used when the numeral system is incorporated into the demonstrative system. The only exception being with the early fossilized animate numerals from 1 to 4. The 'normal' set is *-ne*, *-na*, *-no*, but demonstrative numerals use a secondary set, *-oe*, *-oa*, *-oo*. These are at times written with a /w/, i.e. '*-we*', '*-wa*' which is why in this study they are written as a non-syllabic vowel glide+vowel sequence, *-o̯e*, *-o̯a*, *-o̯o*.

The folllowing points should be kept in mind when looking at the following tables:

Due to the rare occurrances of the Animate Demonstrative above 4 , the orthographic conventions used by Kayser have beenkept, i.e.

ṅ = velar nasal /ŋ/ (otherwise written [ng] or [ñ]

ụ = central vowel (otherwise written [u] or [ü] or [ũ]

Table 31. Animate Demonstrative Numeral.

27.4. Compound Animate Demonstrative Numeral.

Kayser (NG62) states that in the compound demonstrative numeral the first numeral (taken from Cardinal Numeral where no Animate Cardinal Numeral exists) bears the emphatic prefix (*nga-*) or one of the non-emphatic prefixes (excluding *bit-* forms), i.e. *min-* or *mu-*. The end element, which is the simple form of the demonstrative numeral, bears a spatial suffix. Any numbers in between are the simple Cardinal Numerals.

I have only found the following examples, but they do not precisely concur with Kayser's description (NG62) in that the second element of the compound demonstrative numeral does not have a spatial suffix:

410..
metat imin bwe ngaga og Jesus in oereri muoaea [sic; muoea]

28. Male Demonstrative Numeral.

The Male Demonstrative Numeral is composed of fusing the marker for 'male', *'amen'*, to the pre-existing fused Animate Numeral set based on *'amen'*, living being' (See Sections 21 and 27).

Table 33. Male Demonstrative Numeral.

Number	Proximity	End Form	Syncopated Form
Two males	Proximal	amerumene	None
	Medial	amerumena	None
	Distal	amerumeno	None
Three males	Proximal	ametiyimene ameitsijimene ametijimene	ametimene ameitsimene
	Medial	ametiyimena ameitsijimena ametijimena	ametimena ameitsimena
	Distal	ametiyimeno ameitsijimeno ametijimeno	ametimeno ameitsimeno

The origin of these forms, as stated previously, is by fusing the 'male' element *'amen'* to the pre-existing fused forms of the animate demonstrative numeral, i.e. :

amen + rumene > amerumene [Nauruan rhotic regressive assimilation process], and so with medial and distal forms

amen + iyimene
↓
ametiyimene [Nauruan denasalization process] , and so with medial and distal forms
↓
ametimene [syncope], and so with medial and distal forms

Unless special emphasis is evident, when the Male Demonstrative is followed by a proper name or a kinship noun, the gender specific demonstratives appear to act with little demonstrative function, they merely signify the gender/gender and number of the named individual/s and do not require an English translation, or if one is needed, the definite article may be appropriate. Like the other gender-specific demonstratives, it is not used as relativizer.

28.1. Lone Male Demonstrative Numeral.

Kayser also gives a fused form for 30 males (NG32):

Table 34. Lone Male Demonstrative Numeral for 30.

		Simple	Emphatic	NEI	NEII
30 males	Proximal	ametimoeo̱e	ṅametimoeo̱e	minimetimoeo̱e	mu̱metimoeo̱e
	Medial	ametimoeo̱a	ṅametimoeo̱a	minimetimoeo̱a	mu̱metimoeo̱a
	Distal	ametimoeo̱o	ṅametimoeo̱o	minimetimoeo̱o	mu̱metimoeo̱o

Why there should be this single distinct male demonstrative is a mystery. It seems to be based on *'amen'*, *'male'* and *'iyumo'*, *'thirty'*, Animate Cardinal Numeral (see Section 27), i.e. :

amen + iyumo > ametiyumo [in keeping with Nauruan denasalization process]
↓
ametimo [by syncopation]

This fused form uses the secondary set of spatial suffixes, *-o̱e*, *-o̱a*, *-o̱o* which indicates it is a later fused form that happened after *'amen'* ceased to have the original meaning of *'living being'* .

29. Female Demonstrative Numeral.

The Female Demonstrative Numeral is composed of fusing the marker for 'female', *'en'*, to the pre-existing fused Animate Numeral set based on *'amen'*, living being' (See Sections 21 and 27).

Like the other gender-specific demonstratives, it is not used as relativizer.

Table 35. Female Demonstrative Numeral.

Number	Proximity	End Form	Syncopated Form
Two males	Proximal	eirumene ãirumene erumene	None
	Medial	eirumena ãirumena erumenea	None
	Distal	eirumeno ãirumeno erumeno	None
Three males	Proximal	etiyimene ãitsijimene etijimene	etimene ãitsimene
	Medial	etiyimena ãitsijimena etijimena	etimena ãitsimena
	Distal	etiyimeno ãitsijimeno etijimeno	etimeno ãitsimeno

The origin of these forms, as stated previously, is by fusing the 'female' element *'en'* to the pre-existing fused forms of the animate demonstrative numeral, i.e. :

en + rumene > erumene [Nauruan rhotic regressive assimilation process], and so with medial and distal forms

en + iyimene
↓
etiyimene [Nauruan denasalization process] , and so with medial and distal forms
↓
etimene [syncope], and so with medial and distal forms

Unless special emphasis is evident, when the Female Demonstrative is followed by a proper name or a kinship noun, the gender specific demonstratives appear to act with little demonstrative function, they merely signify the gender/gender and number of the named individual/s and do not require an English translation, or if one is needed, the definite article may be appropriate. Like other gender-specific demonstratives they are not used as relativizers.

Examples:

446.

e meken iat eraõ, ũrei ãirumena ñain Ge 19:30 [INCLUSIVE]

3S.DEP dwell+PERF in+3S.POS AB+cave 3T.DEP female+two+ANIM+MED child+3S.POS

if the married couple have disputes in the manner of their dwelling together

29.2. Lone Female Demonstrative Numeral.

Kayser also gives a fused form for 30 females, or an unspecified number of females (NG32):

Table 36. Lone Female Demonstrative Numeral for 30.

		Simple	Emphatic	NEI	NEII
30 males	Proximal	ätijumoeo̧e	ṅätijumoeo̧e	minätijumoeo̧e	mụ̊ätijumoeo̧e
	Medial	ätijumoeo̧a	ṅätijumoeo̧a	minätijumoeo̧a	mụ̊ätijumoeo̧a
	Distal	ätijumoeo̧o	ṅätijumoeo̧o	minätijumoeo̧o	mụ̊ätijumoeo̧o

This is a mysterious doublet with the lone male demonstrative for 30 males (Section 28.1) . This female form has the same origin as the male but unlike the male form it has not undergone syncopation. It is based on *'en'*, *'female'* and *'iyumo'*, *'thirty'*, Animate Cardinal Numeral (see Section 27), i.e. :

en + iyumo > etiyumo [in keeping with Nauruan denasalization process]

This fused form uses the secondary set of spatial suffixes, *-o̧e*, *-o̧a*, *-o̧o* which indicates it is a later fused form.

30. *aben* Demonstrative (Mixed Gender Demonstrative Numeral).

here is a very small set of mixed gender demonstrative numerals based of the pre-existing Animate Demonstrative Numerals for 2 and 3, by the addition of a prefix *'aben'* . The origin of this prefix in not know.

Its formation is:

aben + rumene > aberumene [Nauruan rhotic regressive assimilation process], and so with medial and distal forms

aben + iyimene > abetiyimene [Nauruan denasalization process]
↓
abetimene [by syncopation] and so with the medial and distal forms

Kayser (NG31) gives the following gloss for these forms

'aberumene' (male & female) these two here

'abetimene' (male & female) these three here

Its unclear how this demonstrative functioned as I have only found two occasions in the published materials, and both seem to apply to males (with no females included). So I take Kayser's gloss '(male & female)' to mean this set can be used for either males or females, or mixed gender groups.

Examples:

460.
wo nim õpan bwa aberumene ñaiũ arũmõ megeda,
2S.DEP MOD speak for *aben*+two+ANIM+PROX child+1S.POS 3D.DEDP+MOD sit.down

I allow you, but I don't know now how many your questions are. I give you one but its five that you take. yet more also these two here. yet more that one yonder and more yet also this one here

31. Alternative Strategies for the Animate and Gender Specific Demonstrative Numerals.

The complex system of animate demonstrative numerals above the number 4 as seen in Section 27 and Table 30, has a simpler strategy whereby the animate numeral (where there is one) is preceded by the appropriate animate demonstrative or gender-specific demonstrative.

Examples:

462.
me emwin ngabuna ran an kereri ngabuna oea me arumen Matt 10:1 1976

maybe 3P.DEP make ten.living.beings & two.ANIM E+ANIMP+MED
those men numbered perhaps twelve]

32. Direct Address (Vocative) Demonstrative.

Kayser (NG38,39) presents a very full picture of direct address.

32.1. Direct Address: Singular Fused Demonstratives.

There is a set of fused demonstratives used in the singular. These are taken from the General Demonstrative: Simple set (Section 7.1), and the Male and Female Demonstrative sets (Sections 22 and 25), fused to the 2nd Person Singular Independent Pronoun.

Table 37. Fused Forms of Direct Address (Vocative) Demonstratives (singular).

Addressee	Composition		Fused Form
	Demonstrative	Independent Personal Pronoun	
Male addressed	amune	awe, auwe	amunuwe
Female addressed	etune, eitune, ãitune	awe, auwe	etunuwe, eitunuwe. ãitunuwe
Not gender specific	une	awe, auwe	unuwe

If a personal name is involved, *'amunuwe'* and *'etunuwe'* stand at the head of the phrase, *'unuwe'* stands after the person name.

Examples:

470.
amunuwe Aki! NG38
male+PROX+VOC Aki
Aki! (a man)

471.
Ah, etunuwe, nuwa bet! NG38
Ah female+PROX+VOC go.along also

487.
eitunuwe Tabitha! rida ko Ac 9:40 1976
female+PROX+VOC Tabitha get.up COMM
Tabitha (a woman)! get up!

32.2. Direct Address: Singular Non-Fused Demonstratives.

In addition to these fused forms for the singular, unfused forms can be used, but Kayser noted this was less common (see NG38). The 2nd Person Singular Indipendent Pronoun comes at the end of the addressee.

Examples:

488.
amune auwe! NG38
male+PROX 2S.IND
you! (male addressed)

489.
ätune auwe! NG38
female+PROX 2S.IND
you! (female addressed)

490.
oniṅ une auwe! NG38
young PROX 2S.IND
child!

491.
amen emogur une auwe! NG38
male+CONS AB+work PROX 2S.IND
workman!

33.3. Direct Address: Non-Singular Form of Address.

In the dual, trial, and plural, when the names of addressees come first in the phrase only the simple forms of the animate demonstrative numeral are used, otherwise the names of the addressees follow the phrase .

When the addressee is a group of two, or three, or plural, and one or more of the group is female, then in keeping with Nauruan custom, the female demonstrative numerals or female demonstatives are used (where these exists) or the the animate demonstrative numeral set can be used.

PARTY OF TWO PERSONS

When the party addressed is two persons, the appropriate animate demonstrative numeral is used in conjunction with the 2nd Person Dual Objective Pronoun, *'kamuror/gamũrõr'* .

Examples:

492.
amerumene kamu̱rör Aki me Api! NG39
male+two+ANIM+PROX 2D.OBJ Aki & Api
you two here, Aki and Api! (males addressed)

493.
mu̱rumene kamu̱rör Aki me Api! NG39
NEII+ANIM+PROX 2D.OBJ Aki & Api
you two here, Aki and Api! (males addressed)

494.
minirumene kamu̱rör Aki me Api NG39
NEI+two+ANIM+MED 2D.OBJ Aki & Api
you two here, Aki and Api! (males addressed)

495.
minirumene kamurör Aki me Etobi NG39
NEI+two+ANIM+MED 2D.OBJ Aki and Etobi
you two here, Aki and Etobi! (man and woman addressed)

496.
Api me Aki rumene kamurör! NG39
Api & Aki two+ANIM+PROX 2D.OBJ
Api and Aki, you two here! (males addressed)

497.

ärumena kamụrör Etobi me Ekin! NG39

female+two+ANIM+MED 2D.OBJ Etobi & Ekin

you two over there, Etobi and Ekin! (females addressed)

498.

mụrumena kamụrör Aki me Api! NG39

NEII+two+ANIM+MED 2D.OBJ Aki & Api

you two over there, Aki and Api! (females addressed)

499.

Etobi me Ekin rumena kamurör! NG39

Etobi & Ekin two+ANIM+MED 2D.OBJ

Etobi and Ekin , you two over there! (females addressed)

PARTY OF THREE PERSONS

When the party addresses is three persons, the appropriate animate demonstrative numeral is used in conjunction with the 2nd Person Dual 2nd Person Trial Objective Pronoun, '*kamieiy/kamieij/gamiãi'*.

Examples:

500.
ametimene kamieij NG39
male+three+ANIM+PROX 2T.OBJ
you three men!

501.
ametimena kamieij NG39
male+three+ANIM+MED 2T.OBJ
you three men there!

502.
ametimeno kamieij NG39
male+three+ANIM+DIST 2T.OBJ
you three men yonder!

503.
ätimene kamieij NG39
female+three+ANIM+PROX 2T.OBJ
you three women!

504.
ätimena kamieij NG39
female+three+ANIM+MED 2T.OBJ
you three women there!

505.
ätimeno kamieij NG
female+three+ANIM+DIST 2T.OBJ
you three women yonder!

506.
mụijimene kamieij NG39
NEII+three+ANIM+MED 2T.OBJ
you three men! Or, you three women! Or, you three (one or more being females)!

507.
mijimene kamieij NG39
NEII+three+ANIM+MED 2T.OBJ
you three men! Or, you three women! Or, you three (one or more being females)!

508.
ametimene kamieij Aki me Api me Aku NG39
male+three+ANIM+MED 2T.OBJ
you three, Aki Api and Aku! (males addressed)

509.
ätimene kamieij Etobi me Ekin me Api NG39
female+three+ANIM+MED 2T.OBJ
you three Etobi Ekin and Api! (two females and one male)

PARTY OF FOUR PERSONS

When the party addresses is four persons, the appropriate animate demonstrative plural is used in conjunction with the quadral animate demonstrative and the 2nd Person Plural Objective Pronoun *'kamie/gamiã'*.

Examples:

510.
amebụne amene kamie NG39
male+ANIM.P+PROX four+ANIM+PROX 2P.OBJ
you four men!

511.
änibuna amene kamie NG39
female+ANIM.P+MED four+ANIM+MED 2P.OBJ
you four women there!

PARTY OF MORE THAN FOUR PERSONS

When the party addresses is more than four persons, the appropriate animate demonstrative plural is used in conjunction with the 2nd Person Plural Objective Pronoun *'kamie/gamiã'*.

Examples:

512.
amebụno kamie NG39
male+ANIM.P+DIST 2P.OBJ
you (more than four) men yonder!

513.
änibụno kamie NG39
female+ANIM.P+DIST 2P.OBJ
you (more than four) women yonder!

514.
minibụne kamie NG39

you men whom I love!

33. Demonstrative Cardinal Numeral.

The Demonstrative Cardinal Numeral Simple Form is derived the General Cardinal Numeral (Section 27.1). The numeral Prefix '*a-*' is dropped when the numeral takes on demonstrative functions. The Demonstrative Cardinal Numeral Simple Form can then be combined with all but the *bit-* forms of the prefixes that developed in the General Demonstrative set (i.e. *nga-*, *min-*, *mu-*).

The Function Vowel (Section 27.2) operates in the usual way with these demonstratives.

As mentioned in Section 17, the only divergence with the demonstrative system is that a different set of spatial suffixes is used when the numeral system is incorporated into the demonstrative system. The only exception being with the early fossilized animate numerals from 1 to 4. The 'normal' set is *-ne*, *-na*, *-no*, but demonstrative numerals use a secondary set, *-oe*, *-oa*, -oo. These are at times written with a /w/, i.e. '-we', '*-wa*' which is why in this study they are written as a non-syllabic vowel glide+vowel sequence, *-o̯e*, *-o̯a*, *-o̯o or -u̯e, -u̯a, -u̯o*.

The hundreds suffix is spelt '*-uer, -uar*' by Kayser, but as the 1918 Bible spells this suffix as '*-war*', the '*-ue-, -ua-*' has been taken to be a non-syllabic vowel glide+vowel sequence, '*-u̯e- , -u̯a-*'.

The folllowing points should be kept in mind when looking at the following tables:

12. Due to the rare occurrances of the Demonstrative Cardinal Numeral, the orthographic conventions used by Kayser have been kept, i.e.

    ṅ = velar nasal /ŋ/ (otherwise written [ng] or [ñ]

    ụ = central vowel (otherwise written [u] or [ü] or [ũ]

13. The number '1' is spelt '*aiquön*' in *Nauru Grammar*; however, it is spelt '*aiquen*' in the 1918 Bible and '*aikwen*' in the 1976 New Testament. Hughes phonemicizes it as [ek^{w}en] (Hughes 2020:271).

14. The number '7' is spelt '*aeu*' in '*Nauru Grammar*'; however, it is spelt '*aeiu'* in both the 1918 Bible and the 1976 New Testament. Hughes phonemicizes it as [eiju] (Hughes 2020:271).

15. The number '8' is spelt '*auiju*' in '*Nauru Grammar*'; however, it is spelt *'aoju*' in the 1918 Bible and '*aoiyu*' in the 1976 New Testeament. Hughes phonemicizes it as [o̯ju] (Hughes 2020:271).

16. The vowel combination ‘ai-‘ is now usually pronounced /e/, so:

    aikwen > ekʷen

    aiju > e̯ju

    aijimo > e̯jimʲo

17. The vowel comibation ‘au-, ao-‘ is usually pronounced /o/, so:

    auiju/aoiju > o̯ju

18. between vowels, /j/ (which represents the palatal glide) is moving towards a fricated allophone, [j̯]:

    aiju > e̯ju

    aijimo > e̯jimʲo

    aoju > o̯ju

    The exception is with the numerals ‘7’, ‘*aeiu*’, this is not pronounced with the fricated [j̯], Hughes phonemicizes it as [eiju].

19. The number ‘4’, ‘*aeoq, aeoqu-*‘ is phonemicized by Hughes as [æeokʷ] (Hughes 2020:271).

20. In Kayser’s Grammar, ‘5’ is invariably written ‘*ijimeo*’ ; Kayser (NG3) descibes this /e/ in ‘*ijimeo*’ as a “fleeting slide vowel”. ‘5’ is usually spelt ‘*aijimo*’ and is phonemicized as [e̯jimʲo] by Hughes (Hughes 2020:271).

21. The root forms for ‘2’, ‘5’ and ‘6’ end in /o/ so according to Kayser should take the spatial suffixes ‘-ụe, -*ụa*,-*ụo*’; at times they are spelt with the form ‘-*ọe*, -*ọa*, -*ọo*’, but in this study these are taken as mis-spellings (NG41-43, and 62).

22. The vowel sandhi exibited by the numeral root forms and decade marker ‘-*ma*’ and hundreds marker ‘-*wer*’ is not understood by this writer.

33.1. Compound Demonstrative Cardinal Numeral.

Kayser (NG62) states that in the compound demonstrative numeral the first part bears the empahitic prefix (nga-) or one of the non-emphatic prefixes (excluding *bit*- forms), i.e. *min*- or *mu*-. The second element, which is the simple form of the demonstrative, bears a spatial suffix. Any numbers in between are the simple Cardinal Numerals.

Table 42.Compound Demonstrative Cardinal Numeral [Indicative Table].

34. Classificatory Demonstrative.

It is generally assumed that some form of noun-class system was used in the Proto-Austronesian parent language – and hence, also, in Proto-Oceanic (see Tryon 1995:37). Nauruan, as with other Micronesian languages, would have inherited one or more noun-class indicators from Proto-Oceanic via Proto-Micronesian.

David Gil makes this definition of “classifiers” (David Gil. 2013. Numeral Classifiers http://wals.info/chapter/55, Accessed on 2023-02-11):

“…sortal numeral classifiers. This term makes reference to one of the most salient functions of such forms, which is to divide the inventory of count nouns into semantic classes, each of which is associated with a different classifier.”

The Nauruan language, at the point of the German incorporation of Nauru into the German Empire (1888 onwards), had developed a classificatory system dividing countable objects into over 30 “classifiers”. In Nauruan, a number of the classifiers show a transparent link to noun roots indicating the historical relationship between classifiers and actual objects. For the low numbers 1 – 4, and usually the early decades, there are old fused forms of the numeral plus the classifier. In-between numbers were still associated with the specific classifier by means of a numeral particle formed from the specific classifier.

At some stage in the evolution of the language, Nauruan incorporated the demonstrative function into the classificatory system. Pre-colonisation Nauruan seems to have gone further than other Micronesian languages in incorporating the classifier system into not just the numeral system where it originated, but also into the demonstrative system and the Indefinite Pronoun , and Quantum Interrogative Adverb and Distributive Numeral system. A later development was the incorporation of the demonstrative function into the already existing classificatory numeral set.

Since the last century, the Nauruan way of life has changed totally, so many of the classifiers that had been associated with cultural elements of Nauruan life have dissapeared as those elements of Nauruan cultural life have ceased. Johnson (2002:159) makes the following remark:

“Referring specifically to nominal classification as described by Kayser, Bender (1971 :438) states: ‘George Pittman, who was Director of Education on Nauru for a number of years ..., reports that the present-day language of the younger generation has dropped much of this elaborate apparatus.’ ” And Johnson in her 2002 work, of her seven respondents, only the two oldest respondents maintained some usage of the classifiers as described by Kayser and Hambruch in the early colonial period.

People of faith who make use of the 1918 Bible and 1976 New Testament will be exposed to the pre-colonial classificatory system.

34.1. Outline of Nauruan Classifiers.

In literature, the earlier work, "*Die Sprache von Nauru*" (Hambruch 1914.2, p. 29-30) – said to be an edited version of a manuscript grammar of Nauruan written by the missionary Phillip A. Delaporte (see Rensch 1993, p. VII) – had identified 26 "Wortkategorien" as follows - with the Classifier number as used in this study in italics :

1.	Einer, Zahladverbium, Zahladjektiv [One, number adverb, number adjective] *Not counted as a Classifier* – adverbial prefix	a (?)
2.	Zehner [tens] *Not counted as a Classifier* – decades suffix	ma
3.	Hunderter [hundreds] *Not counted as a Classifier* – low hundreds suffix	bu
4.	Tausender [thousands] *Not counted as a Classifier* – word for thousand	řaṅa
5.	Lebende Wesen, einzeln gezählt [living beings individually counted] *Not counted as a Classifier in this study*	měn
6.	Gruppen lebender Wesen, Familien, Sippen, Fisch-, Vogel- schwärme [groups of living beings, families, clans, schools of fish, swarms of birds] *Classifier 26*	ṅe (?)
7.	Pflanzen, Blumen, Bäume, Sträucher (fruchttragend) [plants, flowers, trees, fruit-bearing shrubs] *Classifier 27*	u̯é (?)
8.	Boote, große Eß schüsseln mit Inhalt [boats, large bowls with contents] *Classifier 12*	ē (?)

9. Trinkschalen, kleine Eßschüsseln
[drinking bowls, small bowls] ūr̄
Classifier 36

10. Matten, Messer, leere Trinkschalen
[mats, knives, empty drinking bowls] ra (?)
Classifier 30

11. Matten mit Fischen gefüllt
[mats full of fish] nī
Classifier 17

12. Blätter, Federn
[leaves, feathers] ri
Classifier 18

13. Abgewickelte Streifen (z.B. von Tabak), Oktopusfüße
[unwound tobacco ropes, octopus tentacles] uā (?)
Classifier 33

14. Kränze, Ketten, Schnüre
[garlands, chains, string] muę
Classifier *24*

15. Lange, große Gegenstände
[long, large objects] mai͡
Classifier 21

16. Quergeteilte Stücke
[timber cut crossways] boṅo
Classifier 2

17. Längsgeteilte Stücke
[timber cut lengthways] a͡i
Classifier 1

18. Beliebig zerteilte, zerbrochene Stücke
(Tabak, Lansparzellen)
[part-cut, broken-up pieces like tobacco, parcels of land] muār̃i
Classifier 23

19. Bündel, natürliche (Kokosnuß, Bananen)
[naturally occurring bundles like coconuts and bananas] mē (?)
Classifier 24

20. Bündel, künstliche (Brotfrüchte, eigene Kokosnüsse, Fische) r̃ā (?)
[customary bundling of things like breadfruit, individual coconuts, fish]
Classifier 31

21. Bündel, künstliche (Schalen, Gefäße)
[customary bundling of things like bowls, vessels] ga (?)
Classifier 14

22. Diminutivform [diminutive form] ki, kẹ
Classifier 20

23. Tage, Nächte, Zeitabschmitte
[days, nights, time periods] bum, buṅ
Classifier 5

24. Generationen
[generations] edeta
Classifier 32

25. Haufen, Mengen, Anhäufungen
[heaps, groups, accumulations] p’o̱
Classifier 29

26. Körbe (mit und ohne Inhalt)
[baskets, with and without contents] buę̄
Classifier 6

27. Landstücke
[plots of land] ęp
Classifier 10

28. Riffpassagen
[reef passages] ęga
Classifier 13

29. Süß-Wasserplätze, Brünnen
[bodies of sweet-water, wells] ę bŏ̱k
Classifier 4

30. Kothaufen
[mounds of human waste] mo͡iyi
Classifier 25

31. Vervielfältigung, Mal
[multiplication, times] uoī̆ ī
Classifier 35

The following table shows the numbers corresponding to Hambruch's classifiers used by Kayser and the present writer.

Table 43. Hambruch Classifier Number and Corresponding Numbering in Kayser 1936 and Williams 2014.

Kayser's *Nauru Grammar* lists 39 "categories", i.e. classifiers (see NG8-10).

These have been re-arranged to a largely alphabetic sequence in the present study.
His number of "categories" has been reduced to 36 classifiers by the following steps:

(a) His "*lifeless*" category 1 has been removed as it has no classificatory marker and is the general form of numeral and the later development of the Demonstrative Cardinal Numeral, and there is no "*lifeless*" classifier connected to the demonstrative system.

(b) his "*living beings*" category 2 has been removed. As seen in Section 21, '*amen*' with the meaning '*living beings*', was an early '*animate*' marker, but at a later time was re-analyzed as '*male*' and was re-incorporated into the demonstrative system with that meaning to produce the Male Demonstratives as well as fusing with pre-existing earlier fused Animate Demonstrative Numerals to produce Male Demonstrative Numerals.

In addition, Sections 23 – 26 and 30 show there are other markers for '*living beings*', male and female.

In addition there is a plural animate marker for '*living beings*', '*bun*' (Section 19).

(c) his "caterogies" 18 and 19 are doublets of the same classifier, and have been re-analyzed as one classifier.

In the re-analyzed listing of the 36 classifiers, each classifier is assigned a shorthand reference, i.e. CL1 (classifier number one) . The number in square brackets is the classifier ("category") number as found in Kayser's *Nauru Grammar* for ease of reference. The phonetic realization is as given by Maggie Jacobs – a Nauruan academic – to Lisa Johnson (see Johnson 2002).

Table 44. Table of Classifiers.

Classifier Number (*Nauru Grammar* Classifier number in brackets)	**Classifier (form and meaning)**
1[16]	ae [aʲæ] piece of flat things, patches. Not elicited by Johnson 2002. Kayser "to define pieces of flat things in general". Hambruch "pieces split lengthwise [längsgeteilte Stücke]".
2[17]	baño/bango [bʌŋo] part of a long object. Not elicited by Johnson 2002. Kayser 1936 "to define longish stiff parts of an object". Hambruch "pieces split across [quergeteilte Stücke]".

3[8]	be [be] coconut palm frond. Johnson (2002:180) indicates some usage among the pre-1970s generations, though its usage has spread to other leaves, showing a blurring of its original meaning being conflated with *ire* classifier domain.
4[10]	bõke/boge [bʲəge] body of fresh water. Not elicited by Johnson (2002). Kayser “fresh-water pits, ponds, pools”. Hambruch “bodies of sweet-water, wells” [Süß-Wasserplätze, Brünnen]
5[11]	bũmi/bumi [bɨmi] Johnson (2002:181,182) shows a continued use of this classifier with older informants. Kayser “nights/24 hour day” Hambruch “days, nights, time periods” [Tage, Nächte, Zeitabschmitte]

6[32]	b^{w}ere [bwere] Not elicited by Johnson (2002:185). Kayser “contents of baskets, bags etc” Hambruch “baskets, with and without contents” [Körbe (mit und ohne Inhalt)]
7[18/19]	bwetsi/bweti~ mwetsi/mweti [bweit^{s}i~bwei3i/ mweit^{s}i~mwei3i] Kayser “long and flexible objects” An alternate form ‘buäiji~muäiji’ appears in the distributive numeral series in Nauru Grammar and is specified as enumerating “slings (used in frigate bird hunting)”. It is suggested here that *mweti* was the original form, the *bweti* form being the result of undergoing the phonological process of prestopping [m- > ^{b}m- > b-]; the resultant form *bweti* continued in use alongside *mweti* and had overtaken it in frequency at the time the colonial period began. Johnson (2002) indicates some usage among older generations for the *bwe-* foms but the *mwe-* forms were not elicited . Hambruch “ garlands, chains, string” [Kränze, Ketten, Schnüre]
8[34]	dume [duume] Not elicited by Johnson (2002) Kayser “contents of wrappings, packets etc”

9[20]	ea [eʲæ] Not elicited by Johnson (2002) Kayser “four parts into which a fish is usually cut up”
10[15]	ebe/äbe [ebe] In use. Kayser “land” Hambruch “ plots of land [Landstücke]
11[7]	eiji/eiyi [e3i] In use. Kayser “words”
12[5]	eo [eʲo] trough-shaped objects like the traditional canoe – and by extension other craft, vehicles, planes. Johnson 2002 indicates some usage among older generations. Kayser “trough-shaped objects” Hambruch “boats, large bowls with contents” [Boote, große Eß schüsseln mit Inhalt]

13[12]	ga [gʌ] reef fissures Not elicited by Johnson (2002) Kayser “fissures on the edge of the reef, passages for canoes” Hambruch “reef passages” [Riffpassagen]
14[24]	ga [gæ] Not elicited by Johnson (2002) Kayser “bundles of coconut shells prepared for handling water” Hambruch “ customary bundling of things like bowls, vessels” [Bündel, künstliche (Schalen, Gefäße)]
15[13]	ime [ime] Not elicited by Johnson (2002) Kayser “sheltering roofs, protecting coverings”
16[38]	in [ʲiin] Not elicited by Johnson (2002) contents of coconut-fibre wrappings of scraped coconut”

17[35]	ine [iine] Not elicited by Johnson (2002) Kayser “contents of leaves wrapped up in paperbag form” Hambruch “mats full of fish” [Matten mit Fischen gefüllt]
18[14]	ire [ire] Not elicited by Johnson (2002) Kayser “single hairs, fibres, feathers, leaves” Hambruch “leaves, feathers” [Blätter, Federn]
19[36]	iwi [iwi] Not elicited by Johnson (2002) Kayser “contents of fishing nets”
20[21]	ke/kä [ke] Some usage, Johnson (2002) Kayser “very small parts of a thing” Hambruch “diminutive form” [Diminutivform]

21[4]	mae [mʲai] long rigid objects Johnson (2002) indicates usage among older generations Kayser “lengthy objects” Also used figuratively for groupings, parts, parties – see Kayser *Nauru Grammar* p.40) Hambruch “long, large objects” L[ange, große Gegenstände]
22[25]	mage [mʌge] Not elicited by Johnson (2002) Kayser “groups”
23[22]	mwari [mʷʌrʰi] Johnson (2002:183) indicates some usage among older generations Kayser “larger pieces of a thing” Hambruch “part-cut, broken-up pieces like tobacco (Tobacco in early colonials days was sold either in large cakes, or in long cables), parcels of land” [Beliebig zerteilte, zerbrochene Stücke (Tabak, Lansparzellen)]
24[26]	mwe/mwo [mʷə] fruits growing in clusters Kayser “clustery or syncarpous fruits” Hambruch “naturally occurring bunches (coconuts, bananas)” [Bündel, natürliche (Kokosnuß, Bananen)] Not elicited by Johnson 2002 though in her study she mentions that this classifier is present in the draft-dictionary of the Department of Education (2002:188).

25[31]	mweiyi [mʷei3i] heaps of excrement Not elicited by Johnson (2002) Hambruch “mounds of human waste” [Kothaufen]
26[27]	ñe/ŋge [ŋe] Not elicited by Johnson (2002) Kayser “kinds, species” Hambruch “groups of living beings, families, clans, schools of fish, swarms of birds” [Gruppen lebender Wesen, Familien, Sippen, Fisch-, Vogel- schwärme]
27[6]	oe/oä [oʷe] plants, vegetation Some usage noted in Johnson 2002 but there is also some evidence from her informants suggesting CL12 *eo* and CL27 *oe* have become somewhat confused (Johnson 2002 :178,179). Kayser “plants, stands for frigatebirds” Hambruch “ plants, flowers, trees, fruit-bearing shrubs” [Pflanzen, Blumen, Bäume, Sträucher (fruchttragend)]
28[37]	pañi/pangi [paŋi] Not elicited by Johnson (2002) Kayser “content of hollows in the reef”

29[30]	powi [po^{w}i] Kayser “heaps and collections of objects”; also used figuratively for groups of people (see NG40). Johnson (2002) indicates some usage among older generations Hambruch “heaps, groups, accumulations” [Haufen, Mengen, Anhäufungen]
30[3]	ra [r^{h}æ] objects conceived of as presenting a flat surface Johnson (2002:172-175) indicates this classifier is still in use Kayser “flat objects” Hambruch “mats, knives, empty drinking bowls” [Matten, Messer, leere Trinkschalen]
31[28]	re/rä [rre] rows/strings of objects; speech-flow, though individual words are used with CL11 [7] Some usage. Kayser “rows, strings of objects” Hambruch “customary bundling of things like breadfruit, individual coconuts, fish” [Bündel, künstliche (Brotfrüchte, eigene Kokosnüsse, Fische)]

32[29]	dete/tete [rere] Not elicited by Johnson (2002) Kayser “layers, pedigrees, generations” Hambruch “generations” [Generationen]
33[9]	wa [wa] Not elicited by Johnson (2002) Kayser “sinews, bands, long flexible objects” Hambruch “unwound tobacco ropes, octopus tentacles” [Abgewickelte Streifen (z.B. von Tabak), Oktopusfüße]
34[33]	wime [wiime] Not elicited by Johnson (2002) Kayser “contents of small fish baskets” for small fish
35[23]	wõri/wori [wʌri] Johnson reports continued use (2002) Kayser “number of times” Hambruch “multiplication, times” [Vervielfältigung, Mal

36[39]	wũri/wuri [wɨri] content of open-mouthed receptacle contents of receptacles like a bowl, glass, open mouthed containers, but not storage vessels (bottles, etc.). This classifier only applies if a substance is in an open container ready to be consumed, but not in a closed container for storage. Johnson (2002:185-187) indicates continued use among pre-1970s generation Kayser "contents of vessels". Also used figuratively for membership (of clubs, congregations) (see NG40) Hambruch "drinking bowls, small bowls" [Trinkschalen, kleine Eßschüsseln]

The formation of the Classificatory Demonstrative is regular.

The Simple form is formed by fusing the classifier with the spatial markers -ne/-na/-no

The usual prefixes taken from the General Demonstrative set, *nga-*, *min-*, *mu-*, can be prexifed to the simple for

Table 45. Classificatory Demonstratives.

Classifier Number (*Nauru Grammar* classifier number in brakets)	Classifier form and meaning	Spatial location	Simple	Emphatic	NEI	NEII

35. Classificatory Demonstrative Numeral.

The Classificatory Demonstrative Numeral is one of the unique features of the Nauruan language. The Classificatory Demonstrative Numeral Simple Form is derived the Classificatory Cardinal Numeral, which is itself derived from the General Cardinal Numeral (Section 27.1).

35.1. Classificatory Cardinal Numeral.

The following information on the Classificatory Cardinal Numeral sets the setting for the Classificatory Demonstrative Numeral. As with all the numeral forms, only those distinct forms in use are recorded by Kayser, those that lack fused forms make recourse to the numeral particle in conjunction with the Cardinal Numeral (NG69).

The low numbers 1 – 4 are formed thus:

Numeral Prefix ’*a*-‘ + numeral root + Classifier

Example:

Classifier 30[3] '*ra'*

Table 46.Classificatory Cardinal Numeral: Classifier 30[3] 'ra' Low Numbers Formation.

Classificatory Cardinal Numeral	Composition			End form
	Numeral Prefix	Numeral	Classifier	
1	a	ai	ra	airan (the *-n* is probably a fossilized construct suffix)
2	a	ro	ra	arura
3	a	iyu	ra	ayira
4	a	a	ra	ara

The higher numbers are formed thus:

Numeral Prefix *'a-'* + Classifier +Construct Suffix *'n'* + numeral root

Example:

Classifier 30[3] '*ra'*

Table 47. Classificatory Cardinal Numeral: Classifier 30[3] 'ra' High Numbers Formation.

	Numeral Prefix	Classifier	Construct Suffix	Numeral	
5	a	ra	n	iyimo	aratiyimo
10	a	ra	n	ta	arata
20	a	ra	n	ruma	araruma
30	a	ra	n	iyimo	aratimo
50	a	ra	n	iyima	aratima
90	a	ra	n	duma	araduma
100	a	ra	n	ibu	aratebu
200	a	ra	n	robu	ararobu
300	a	ra	n	iyubu	aratiyibu
500	a	ra	n	iyimower	aratimower

The fused forms show at least three Nauruan phonological processes at work: denasalization, rhotic regressive assimilation and dental plosive regressive assimilation as well as syncope.

Denasalization:

5, a+ra+n+iyimo
↓
aran iyimo
↓
aratiyim^{j}o

30, a+ra+n+iyumo
↓
aran iyumo
↓
aratiyimo

As said before, where no fused form exists, use is made of the Numeral Particle for the Classifier and the appropriate General Cardinal Numeral.

The numeral particle is formed regularly:

Table 50. Formation of Calssificatory Numeral Particle using Classifier 30[3], 'ra'.

Numeral Prefix	Classifier	Construct Suffix	End Result
a	ra	n	aran

Table 51. Indicative Table of Fused and Non-Fused Forms of Classificatory Cardinal Numeral for Classifier 30{3], 'ra', 1 – 10:

Classificatory Cardinal Numeral for Classifier 30{3], 'ra', 1 – 10									
1	2	3	4	5	6	7	8	9	10
airan	arura	aijira	ara	aratijimeo or aran o aijimeo	aran o aṅo	aran o aeu	aran o auju	aran o ado	arata

Note: The Function Vowel 'o' is optional.

35.2. Classificatory Demonstrative Numeral: Formation and Examples

The Numeral Prefix '*a-*' is dropped when the numeral takes on demonstrative functions.

The Classificatory Demonstrative Numeral Simple Form is derived from the Classificatory Cardinal Numeral (35.1) which can then be combined with all but the *bit-* forms of the prefixes that developed in the General Demonstrative set (i.e. *nga-*, *min-*, *mu-*).

The Function Vowel (Section 27.2) operates in the usual way with these demonstratives.

As mentioned in Section 17, the only divergence with the demonstrative system is that a different set of spatial suffixes is used when the numeral system is incorporated into the demonstrative system. The only exception being with the early fossilized animate numerals from 1 to 4. The 'normal' set is *-ne*, *-na*, *-no*, but demonstrative numerals use a secondary set, *-oe*, *-oa*, -oo. These are at times written with a /w/, i.e. '*-we*', '*-wa*' which is why in this study they are written as a non-syllabic vowel glide+vowel sequence, *-o̯e*, *-o̯a*, *-o̯o or -u̯e, -u̯a, -u̯o*.

The hundreds suffix is spelt '*-uer, -uar*' by Kayser, but as the 1918 Bible spells this suffix as '*-war*', the '*-ue-, -ua-*' has been taken to be a non-syllabic vowel glide+vowel sequence, '*-u̯e- , -u̯a-*'.

The complex system encountered up to the first half of the 20th century has largely gone into disuetude in contemporary Nauruan except for a few oft-used forms which are in use.

The folllowing points should be kept in mind when looking at the following tables:

1. Due to the rare occurrances of the Classificatory Demonstrative Numeral, the orthographic conventions used by Kayser have been kept, i.e.

   ṅ = velar nasal /ŋ/ (otherwise written [ng] or [ñ]

   ụ = central vowel (otherwise written [u] or [ü] or [ũ]

2. The number '7' is spelt 'aeu' in 'Nauru Grammar'; however, it is spelt 'aeiu' in both the 1918 Bible and the 1976 New Testament. Hughes phonemicizes it as [eiju] (Hughes 2020:271).

3. The number ‘8’ is spelt ‘auiju’ in ‘Nauru Grammar’; however, it is spelt ‘aoju’ in the 1918 Bible and ‘aoiyu’ in the 1976 New Testeament. Hughes phonemicizes it as [oⱼu] (Hughes 2020:271).

4. The vowel combination ‘ai-‘ is now usually pronounced /e/, so:

   aikwen *> ekwen*

   aiju *> eⱼu*

   aijimo *> eⱼimjo*

5. The vowel comibation ‘au-, ao-‘ is usually pronounced /o/, so:

   auiju/aoiju *> oⱼu*

6. between vowels, /j/ (which represents the palatal glide) is moving towards a fricated allophone, [ⱼ]:

   aiju *> eⱼu*

   aijimo *> eⱼimʲo*

   aoju *> oⱼu*

The exception is with the numerals ‘7’, ‘*aeiu*’, this is not pronounced with the fricated [ⱼ], Hughes phonemicizes it as [eiju].

7. The number ‘4’, ‘*aeoq, aeoqu-*‘ is phonemicized by Hughes as [æeokʷ] (Hughes 2020:271).

8. In Kayser's Grammar, '5' is invariably written '*ijimeo*' ; Kayser (NG3) descibes this /e/ in '*ijimeo*' as a "fleeting slide vowel". '5' is usually spelt '*aijimo*' and is phonemicized as [eɟimʲo] by Hughes (Hughes 2020:271).

9. The root forms for '2', '5' and '6' end in /o/ so according to Kayser should take the spatial suffixes '*-u̯e*, *-u̯a*,*-u̯o*'; at times they are spelt with the form '*-o̯e*, *-o̯a*, *-o̯o*', but in this study these are taken as mis-spellings (NG41-43, and 62).

10. The vowel sandhi exibited by the numeral root forms and decade marker '*-ma*' and hundred marker '*-wer*' is not understood by this writer.

11. (a) Numeral 1, as with the Animate Demonstrative Numeral (Section 27), the Classificatory Demonstrative Numeral Simple Form for '1' is suppletive and is taken from the Classificatory Demonstrative series.

    (b) Numeral 1, forms with the prefixes *nga-*/ *min-*/ *mu-*, is based on the Classificatory Cardinal Numeral, with spatial suffixes *-ne*/ *-na*/ *-no*

    (c) Numerals 2 upwards are based on the Classificatory Cardinal Numeral ; the low numbers 2-4 are fused forms of numeral + classifier; the higher numbers are fused forms of classifier+ numeral, with the '-o̯e, *-o̯a*, *-o̯o*'/*-u̯e*, *-u̯a*,*-u̯o* spatial suffixes

Table 52. Classificatory Demonstrative Numeral – low numbers (Adapted from Kayser)

35.3. Compound Classificatory Demonstrative Nunmeral.

The Compound Classificatory Demonstrative Numeral follows the same pattern as the Compound Demonstrative Numeral (Section 33.1).

The first part of the compound numeral is the simple classificatory cardinal numeral and bears the emphatic prefix (*nga-*) or one of the non-emphatic prefixes (excluding *bit-* forms), i.e. *min-* or *mu-*. The last element, which is the simple form of the classificatory demonstrative numeral, bears a spatial suffix. Any numbers in between are the simple Cardinal Numerals.

36. Usage in relative clauses

As link words in relative clauses, *Nauru Grammar* (NG63) states that classificatory demonstratives "are used in the singular only". In the plural the general demonstratives are used.

37. Notes

[1] - Nauru Congregational Church 1887 – 1987, p 12.

[2] - (1) PacCONDic Islands Monthly, Vol. 11, No. 4, p 21; (2) Father Alois Kayser and the Recent History of the Nauruan language, *in* Nauru Grammar by Alois Kayser MSC, edited by Karl H.M. Rensch (p I – XIII). Embassy of the Federal Republic of Germany, ACT, Australia. 1993.

[3] - (1) Chiefs of Baitsi, Papers of Camilla Wedgwood, National Library of Australia;
(2) Nauru Detudamo 17.II.35, p 10. Papers of Camilla Wedgwood, National Library of Australia.

[4] – 'Micronesian' in this paper is used to describe the group of languages sharing the same common ancestor language that developed from the earlier ancestor language referred to as 'Proto-Oceanic' – itself a descendent of the original ancestor language referred to as 'Proto-Austronesian'. The major member languages of the Micronesian group of languages are (alphabetically): Carolinian, Chuukese-Mortlockese, Kiribati, Kosraean, Marshallese, Mwokilese, Nauruan, Pingelapese, Pohnpeian, Puluwatese, Satawalese, Sonsorolese, Ulithian, and Woleaian.

Micronesian, used as a cultural/geographic area, includes (in addition to the above):

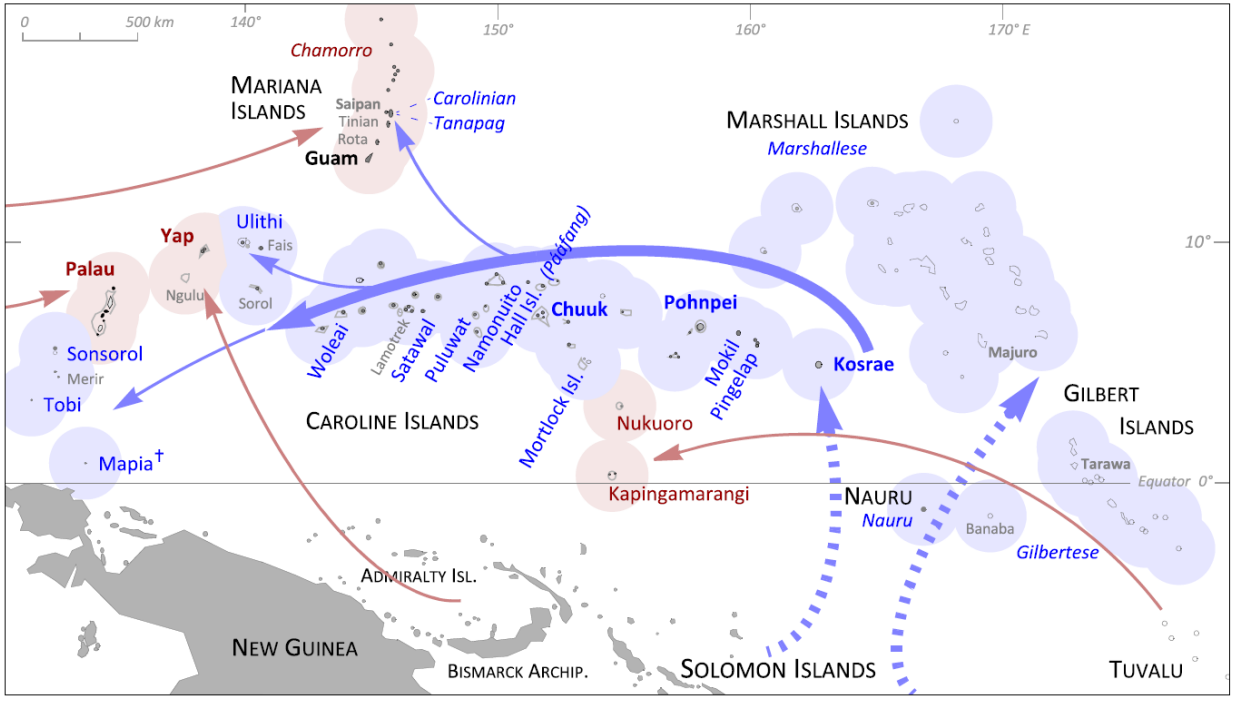
(a) the people of Belau, and the Chamorro people of Guam and the Mariana Islands (the languages of these two peoples are more closely related to the languages of the Philippines, and these two peoples appear to have been in-situ far longer than any of the other groups);

(b) the people of Yap (who predated the arrival of the peoples now speaking the Micronesian group of languages, but whose language descended from Proto-Oceanic);

(c) the people of the atolls of Kapingamarangi and Nukuoro, who are members of the Polynesian group of languages (also descended from Proto-Oceanic), who are more recent neighbours.

Map : Micronesian Expansion (from Andrea Bender and Sieghard Beller, 'Ways of counting in Micronesia', Historia Mathematica 56)

Micronesian pathways in blue, non-Micronesian ones in dark red.
Shaded circles indicate a 100-mile radius around islands, the average distance of an overnight voyage (Marck, 1986)



[5] – see Frederick H. Jackson, On determining the external relationships of the Micronesian languages, 1986.

[6] - Another contributory factor to the change in Nauruan culture and language stability must be attributed to the cruelty perpetrated against the Nauruan people by the Imperial Japanese Forces during the 2nd World War.

At the outbreak of the war in 1940 the Nauruan people numbered 1800 (Report to the Council of the League of Nations on the Administration of Nauru during the year 1940, page 25).

Following the invasion and occupation of Nauru by the Imperial Japanese Forces on 26th August 1942, a horrendous situation befell the Nauruans. Mistreatment and food shortages

were daily sufferings until liberation by the Australian armed forces on 13th September 1945 (Tanaka 2010).

This was compounded by the forced removal of 1200 Nauruans to the Chuuk archipelago in 1943 where mistreatment and starvation resulted in a 38% fatality rate. The gatekeepers of Nauruan custom were decimated: the 1933 Census enumerated 65 Nauruans aged 60 years and above (4 % of the population of 1540). By 1948, out of 1448 Nauruans only 15 Nauruans (1%) were aged 60 years and above (Commonwealth Bureau of Census and Statistics Bulletin No.7, 1934; Report to the General Assembly of the United Nations 1949).

Footnote 1: Another possible origin of the fused forms for male and females is by using the construct suffix as below:

Proximal: en, female + in, Construct Suffix + une, Proximal Demonstrative, Simple Form
> et + in + une > etin + une [through denasalization]
> etinune > etune [syncopation]
Medial: en, female + in, Construct Suffix + una, Proximal Demonstrative, Simple Form

> et + in + una > etin + una [through denasalization]
> etinuna > etuna [syncopation]
> etuna > eta [syncopation]
Distal: en, female + in, Construct Suffix + uno, Proximal Demonstrative, Simple Form
> et + in + uno > etin + uno [through denasalization]
> etinuno > etuno [syncopation]
